Corning® Reusable Plastic Wash Bottles, Low Density Polyethylene, with PP Screw Cap

These bottles are manufactured from low density polyethylene and are offered with a narrow or wide-mouth. The cap and dispensing tube are manufactured from PP to optimize backflow of the solution. The design allows minimal turbulence of the liquid in the bottle.

Capacity

	250 mL
	500 mL

Corning® Gosselin™ Water Sampling Bottles

- Break-resistant polyethylene terephthalate (PET) or High-density Polyethylene (HDPE)
- Molded graduations
- Leak-proof tamper-evident HDPE screw caps are available for the 500 mL and 1L bottle not the 250 mL.
- Available with or without sodium thiosulfate
- Traceable labels
- Large openings minimize risk of contamination
- Film-packed or individually bagged

Corning® Easy Grip Polystyrene (PS) Storage Bottles

- Disposable polystyrene bottles for storage of media, buffers, and other aqueous solutions
- Corning low profile style has easy grip sides that facilitate handling
- Plug seal caps (45 mm) provide an airtight seal and help minimize the risk of contamination.
- Bottles can be used with Corning vacuum filtration systems with 45 mm neck sizes (Cat. Nos. 430626, 430627, 431161, 430049, 430513, 430514, 431118, 430015, and 431174).
- Sterile
- Nonpyrogenic

Corning® PET Media Bottles with Leak-proof Screw Cap Validated Against IATA Standards

Polyethylene terephthalate (PET) bottles are ideal for storage and sampling of media, biologicals, and other aqueous solutions. The PET resin makes the bottle lightweight, break-resistant and as transparent as glass.

Features:

- Packaged in two convenient, shrink-wrapped trays within an outer bag to assure cleanliness
- Break-resistant bottles are an ergonomic and easy to handle alternative to glass
- Bottles are sterilized to 10⁻⁶ SAL and nonpyrogenic
- Leakproof screw cap is validated against IATA standards for air shipments
- Molded graduations for accurate measurements
- USP Class VI compliant bottles are validated noncytotoxic and nonhemolytic

Capacity

Corning® 850cm² Polystyrene Roller Bottle with Easy Grip Cap, Not Treated, 1 per Bag, 40 per Case

Product Number 431644

- To be used with Tubing Set (Cat. No. 10043)
- Bottles are manufactured from virgin polystyrene, caps from high density polyethylene
- Both resins meet the USP Class VI requirements for plastic containers and closures
- Chemically resistant, heat sealable flexible tubing
- One piece seamless construction with printed graduations
- Printed lot numbers to aid in product traceability
- Sterilized by gamma radiation and nonpyrogenic
- Easy Grip Cap features large knurls designed for ergonomic handling

Falcon® Cell Culture Dishes

- Flat, optically clear polystyrene surfaces for distortion-free microscopic visualization of cells
- Uniform surface chemistry created by vacuum-gas plasma treatment promotes cell attachment
- Improved handling of small dishes with the unique Easy-Grip design
- Nonpyrogenic
- Sterilized by gamma irradiation
- Packaged in peel-open, medical-style bags
- Crystal-grade virgin polystyrene
- Standard Tissue Culture (TC), Corning® Primaria™ surface treatment and non-TC-treated polystyrene available

Designed for cell culture

- Flat, distortion-free optics
- Lids designed for optimal gas exchange
- Stacking rings allow for easier stacking and handling
- Vacuum-gas plasma treatment permanently and consistently modifies the cell growth surface
- Standard tissue culture surface is hydrophilic and contains a variety of negatively charged functional groups that support cell attachment and spreading
- Corning Primaria tissue culture surface additionally incorporates nitrogen-containing functional groups and has been shown to support improved attachment, spreading, and differentiation of some cell types

Falcon® Containers

- Sterile, disposable polypropylene containers provide secure sample containment
- Available in 4 1/2 oz. (110 mL) and 8 oz. (220 mL) sizes both with and without matching lids
- Feature molded-in graduations for easy measurements
- Graduated in ounces and milliliters to provide convenient, single-use, timesaving containers for collection, transportation, and storage of a wide variety of specimens
- Inert and chemically resistant to commonly used laboratory reagents at room temperature

Features

- Sterile
- 4 1/4 oz. graduations from 1/2 oz. to 4 1/2 oz. in 1/4 oz. increments and from 20 mL to 110 mL in 10 mL increments
- 8 oz. size graduated from 1/4 oz. to 8 oz. in 1/4 oz. increments and from 20 mL to 220 mL in 10 mL increments

Corning® Snap-seal Disposable Plastic Sample Containers

Designed for a wide variety of applications, these containers provide a reliable leak-tight seal when closed properly. The Snap-Seal locking device keeps the cap closed and secure. The specially designed hinged cap stays in place in use, reducing the chance of sample contamination. The containers are made of recyclable polypropylene, in a translucent style for normal usage. The containers are graduated in both milliliters and ounces, and the cap has a rough surface for marking.

Corning® Coliform Water Test Sample Container, Sterile without Sodium Thiosulfate Tablet

Product Number 1705-100

These 100 mL capacity Corning® containers are used to test nonchlorinated drinking water.

- Does not contain a sodium thiosulfate tablet. Manufactured from pure, recyclable polypropylene.
- Capacity: 120 mL total capacity.
- Capacity at line: 100 mL ±2.5 mL (2.5%).
- The one-piece container has attached lid to reduce chance of contamination.
- Locking arrow assures sterility has not been compromised.
- Leak tight when sealed properly. An added benefit is the tie-down which protects against accidental opening.
- Sterile-by-process

Corning® Coliform Water Test Sample Container, Sterile with Sodium Thiosulfate Tablet

Product Number 1700-100

(This is the suggested replacement for 1700-100B)

These 100 mL capacity Corning containers are used to test for the presence of coliform bacteria, microbiological contaminants in drinking water.

- Capacity: 120 mL total capacity.
- Capacity at line: 100 mL $\pm$ 2.5 mL (2.5%).
- Manufactured from pure polypropylene in a sterile environment and sterile-by-process.
- The one-piece container has attached lid to reduce chance of contamination.
- Locking arrow assures sterility has not been compromised.
- A sodium thiosulfate tablet has been added to each container thus saving lab prep time and expense.
- Leak tight when sealed properly. An added benefit is the tie-down to protect from accidental opening and also serves as a custody seal.
- Sample label and instructions for use are supplied with each.
- A low cost, convenient product which meets EPA requirements.

Costar® Snap Cap Polypropylene Microcentrifuge Tubes

- Supplied nonsterile and are autoclavable.
- External graduations and frosted writing spot for easy sample identification.
- Positive seal design allows repeated opening and closing.
- Flat cap surface for convenient labeling.
- Withstands a maximum RCF of 17,000 x g.
- Costar low binding microcentrifuge tubes feature a bonded polymer technology that reduces protein and nucleic acid binding, resulting in better sample recovery.
- RNase-/DNase-free.

Compound Library Storage – Mini Tube System (MTS) Caps

Axygen® Mini Tube Systems are available in 8-cap or 12-cap strip format. They are also available in 0.65 mL single mini tube or 1.1 mL single mini tube. Mini Tube System racks are compatible with Beckman Coulter, Tecan, and other automation workstations.

- Rack features a one-way lid design and alpha-numeric grid
- Molded-in condensation rings on the lid minimize cross contamination

Axygen® MaxyClear SnapLock Microcentrifuge Tubes

Axygen MaxyClear microcentrifuge tubes are available in a variety of colors. Axxygen Maxymum Recovery® surface and sterile options are also available. SnapLock microcentrifuge tubes have frosted cap surfaces and frosted side panels, ideal for labeling. Each cap features a piercing port in the center of the cap. Microcentrifuge tubes with no caps are available for some sizes.

- 0.6 mL, 1.5 mL, and 2.0 mL clear microcentrifuge tubes are boil proof. Colored tubes are not boil-proof.
- Co-polymer tubes offer exceptional strength and chemical resistance. Not to be autoclavable or boil-proof.
- Clear microcentrifuge tubes are boil-proof. Colored tubes are not boil-proof.
- Maximum G-force is 14,000 RCF.
- RNase-/DNase-free and nonpyrogenic
- Sterility Assurance Level (SAL) of 10⁻⁶
- Color - Assorted: Each pack contains a mixture of blue, green, violet, orange, red, and yellow.
- Clear microcentrifuge tubes are boil-proof. Colored tubes are not boil-proof.
- Color - Spectrum: 2 packs each of blue, green, orange, red, and yellow.

Axygen® Screw Cap Tubes

Axygen microcentrifuge tubes feature a screw cap that provides a tight secure seal. Screw cap tubes are available in a variety of colors with a conical or self-standing bottom. Sterile options are also available.

- Maximum G-force is 20,000 RCF.
- RNase-/DNase-free
- Nonpyrogenic

Tubes, with Cap, Sterile

All sterile screw cap microcentrifuge tubes are pre-assembled with non-looped caps with O-Rings.

Colored-cap versions are also available in sterile format.

Falcon® Round Bottom High-clarity Polypropylene Tube

- Widely used and referenced in laboratory protocols
- Dual position snap-cap prevents sample loss with ease of handling
- Sterile, nonpyrogenicity tested to less than 0.1 EU/mL (Cat. No. 352002 nonsterile)

The foundation for consistent research results

- Provide reliable containment of laboratory fluid samples
- Polypropylene tubes are best suited for applications requiring greater thermal and chemical stability
- Dual-position snap caps, heavier gauge walls, and unique construction provide a secure, positive seal
- Medical-style packaging materials
- 3,000 RCF rating (RCF claims refer to Relative Centrifugal Force measured in g-force for materials with a specific gravity of 1.0, used in an appropriate rotor with correct cushion and safety precautions. Tubes used with organic solvents at temperatures below 0°C may have lower RCF ratings.)
- 17 x 100 mm tubes have blue printed graduations and white writing patch
- Tube dimensions and volumes are approximate

Falcon® Round Bottom Polystyrene Tubes

- Widely used and referenced in laboratory protocols
- Dual position snap-cap prevents sample loss with ease of handling
- Sterile, nonpyrogenicity tested to less than 0.1 EU/mL (Cat. No. 352008 nonsterile)

The foundation for consistent research results

- Provide reliable containment of laboratory fluid samples
- Polystyrene tubes are best suited for procedures requiring high optical clarity
- Dual-position snap caps, heavier gauge walls, and unique construction provide a secure, positive seal
- Medical-style packaging materials
- 1,400 RCF rating (RCF claims refer to Relative Centrifugal Force measured in g-force for materials with a specific gravity of 1.0, used in an appropriate rotor with correct cushion and safety precautions. Tubes used with organic solvents at temperatures below 0°C may have lower RCF ratings.)
- Tube dimensions and volumes are approximate

Compound Library Storage – Mini Tube System (MTS)

Axygen® Mini Tube Systems are available in 0.65 mL single mini tube or 1.1 mL single mini tube. They are also available in 8-cap or 12-cap strip format. Mini Tube System racks are compatible with Beckman Coulter, Tecan, and other automation workstations.

- Rack features a one-way lid design and alpha-numeric grid
- Molded-in condensation rings on the lid minimize cross contamination

Spin-X® Centrifuge Tube Filters

- Spin-X centrifuge tube filters consist of a membrane-containing filter unit within a microcentrifuge tube.
- Uses: Removing bacteria, cells, and particles from liquids; HPLC sample preparation; DNA removal from agarose or acrylamide gels. Maximum RCF is 16,000 x g.

PYREX® VISTA™ Culture Tube, Screw Cap, Phenolic Cap

These culture tubes are supplied with deep-form phenolic caps with a rubber liner to facilitate handling and sealing after autoclaving. The blue enamel marking spot gives an excellent surface for pencil notations. Pencil marks are easily erased.

For replacement phenolic caps, see Cat. No. 9999.

Corning® 96 1D/2D Bar Coded Storage Tubes

A System Solution for Automated Sample Management

The 1D/2D storage line offers a superior storage solution designed to provide maximum identification.

- Temperature-resistant polypropylene storage tubes withstand a temperatures range from -100°C to +110°C.
- Maximum identification – Synchronized 2D and linear bar code along with marking spot.
- Maximum information – 14 x 14 dot 2D bar code.
- Bar code stability – Laser-etched for permanent identification.
- Compound compatibility – Universal inert polypropylene construction throughout.
- Nonsterile.

PYREX® Disposable Glass Conical Centrifuge Tubes, Ungraduated, without Screw Cap

These tubes feature more consistent uniform wall thickness, a well formed conical tapered tip, and durable tip radius. The tubes are designed to withstand centrifugation up to 3000 RCF.

Screw caps are sold separately. Product is supplied nonsterile.

For screw caps, see Cat. Nos. 9998-13, 99999-13 to fit Cat. No. 99502-5; see Cat. No. 9998-15, 99999-15 to fit Cat. Nos. 99502-10, 99502-15; see Cat. Nos. 9999-24 to fit Cat. No. 99502-50.

Falcon® Flask Vented Caps

- Ensure consistent gas exchange and minimize contamination
- Polyethylene caps with an integral, hydrophobic 0.2 µm microporous membrane filter vent allow consistent gas exchange when the caps are in the closed position.
- Gases required for cell growth and metabolism pass freely through the vent while microorganisms cannot. Falcon vented caps will not wet out.
- Vented caps minimize contamination associated with standard open incubation. The vented caps prevent media that can become trapped in a partially opened cap from blocking gas exchange. The caps will not fall off in the incubator because of vibration.

Corning® Volumetric Flasks, PMP, Class A

Translucent flask is supplied with tapered polypropylene stopper with an individually calibrated graduation line. The product is manufactured to Class A tolerances as defined by ISO 1042. They are supplied with an imprinted lot number and certificate. These flasks may be autoclaved to 121°C without affecting the graduation tolerance. Recommended routine cleaning up to 60°C will preserve graduation markings. Height dimension is for flask only, without stopper.

Corning® Preassembled Closed System Solutions for Erlenmeyer Flasks

Full closed systems solutions are offered with Aseptic Transfer Cap preassembled to a Polycarbonate Erlenmeyer Flask. A preassembled vessel offers a complete aseptic solution and are available for the 125mL, 250mL, 500mL, 1L, 2L, 3L, and 5L flask sizes.

The transfer caps have two ports: One port ends in a 0.2 µm filter, and the other port is chemically resistant, heat sealable flexible tubing, ending in either a Male Luer Lock or a Male Polycarbonate quick connect. The dip tube reaches all the way to the bottom of the flask for easy aseptic transfer of your liquid handling processes.

- Sizes range from 125mL to 5L
- MLL or MPC tubing connector types
- Individually packaged
- Double-bagged
- Sterility Assurance Level (SAL) of 10⁻⁶

Advanced Polyethylene CentriStar™ Cap for 50 mL Centrifuge Tubes, Sterile

Product Number 431473

The CentriStar™ Cap has a easy-on/easy-off flat top and offers advanced ergonomics with its wider knurls and roll-over edge design for easier gripping. This leak-proof design comes with a revolutionary plug feature that virtually eliminates all see page when used under recommended conditions. Please check our resources listed below on the physical and chemical properties of Corning plastic centrifuge tubes as well as important suggestions for safe use.

Corning® 33 mm Polyethylene Vented Cap

Product Number 3968

(This is the suggested replacement for 3280)

- 33mm threaded cap
- Vented cap has 0.2 µm pore nonwetable (hydrophobic) membrane sealed directly to the cap
- Allows gas exchange while minimizing the risk of contamination
- Sterilized by gamma irradiation

Corning® 33 mm Polyethylene Universal Cap with Vented Overcap

Product Number 3732

Disclaimer: This product is not intended to mitigate the presence of microorganisms on surfaces or in the environment, where such organisms can be deleterious to humans or the environment.

(This is the Suggested Replacement for: 3332)

- Designed to fit pre-existing filling systems for other product brands
- 33mm polyethylene threaded cap
- Vented overcap has 0.2 µm PTFE membrane sealed into the peelable foil cover
- Sterilized by gamma irradiation
- Double bagged

Corning® Filter Adapter Caps [2] and Solid Overcap [1] for Corning® Universal Caps

Product Number 3324

Disclaimer: This product is not intended to mitigate the presence of microorganisms on surfaces or in the environment, where such organisms can be deleterious to humans or the environment.

- Overcaps made from polyethylene
- Filter adapter caps have peel-away covers for inserting barbed disc filters for sterile venting with 0.2 µm membrane
- Sterilized by gamma irradiation
- Solid red overcap is used in closed systems or applications where venting is not necessary

Disposable Anti-static Spatulas

- Corning spatulas are designed to save time and to provide contamination-free samples.
- Eliminates the recycling and resterilizing necessary with reusable spatulas.
- Available in five different configurations.
- Microspatulas available in two configurations.
- Individually packaged.
- Antistatic.
- Sterile.
- RNase-/DNase-free.
- Nonpyrogenic.

Corning® HYPERFlask® Cell Culture Vessels

The Corning High Yielding Performance Flask (HYPERFlask) cell culture vessel offers 1720 cm² growth area in the footprint of a traditional 175 cm² flask. This high yield, high performance flask utilizes a multilayered gas permeable growing surface for efficient gas exchange.

- Innovative Design – 10 interconnected polystyrene growth surfaces
- Optimal Growth – Corning CellBIND® Surface treated gas permeable polystyrene for superior cell attachment and growth
- Increase Cell Yield – 10-fold higher cell yields increases productivity and capacity and reduces processing time and incubator space
- Save Time and Space – Reduce processing time and incubator storage space by handling one flask as compared to 10 traditional 175 cm² flasks
- Automation Compatible – Bar coded and compatible with The Automation Partnership SelecT™ and Compact™ SelecT™ cell culture systems with an upgrade

The Corning HYPERFlask Cell Culture Vessel has the same external dimensions as a standard T 175 cm² flask with 10 times the cell yield.

Axygen® Microcentrifuge Tube Storage Boxes

Axygen® Storage Boxes are ideal for sample storage. These polypropylene boxes are engineered to withstand the harsh environments necessary for daily workflows in your laboratory. This includes freezing temperatures at -80°C and autoclaving temperatures up to 121°C to ensure a lasting, durable product. The positive catch on the product anterior keeps the lid securely fastened, whereas the 3-point hinge functions to maintain its integrity during repeated use located on the product posterior. Sample identification can easily be assigned using the alpha-numeric indexing stamped on the inner perimeter of each box. The clear lids allow visibility when the lid is closed as this feature pairs well with our microcentrifuge tubes solution noted within the accessories section. Boxes are available in a variety of colors for coding samples and holds 100 x 1.5 to 2.0 mL tubes, cryogenic vials, or chromatography vials. A solid black box, including the lid, is available for light-sensitive samples (142 x 142 x 55 mm).

Key Features

- Supports freezing at -80°C and autoclaving at 121°C
- Alpha-numeric sample identification
- 100 x 1.5 to 2.0 mL tube capacity

Falcon® Cell Culture Dishes

- Flat, optically clear polystyrene surfaces for distortion-free microscopic visualization of cells
- Uniform surface chemistry created by vacuum-gas plasma treatment promotes cell attachment
- Improved handling of small dishes with the unique Easy-Grip design
- Nonpyrogenic
- Sterilized by gamma irradiation
- Packaged in peel-open, medical-style bags
- Crystal-grade virgin polystyrene
- Standard Tissue Culture (TC), Corning® Primaria™ surface treatment and non-TC-treated polystyrene available

Designed for cell culture

- Flat, distortion-free optics
- Lids designed for optimal gas exchange
- Stacking rings allow for easier stacking and handling
- Vacuum-gas plasma treatment permanently and consistently modifies the cell growth surface
- Standard tissue culture surface is hydrophilic and contains a variety of negatively charged functional groups that support cell attachment and spreading
- Corning Primaria tissue culture surface additionally incorporates nitrogen-containing functional groups and has been shown to support improved attachment, spreading, and differentiation of some cell types

Corning® PETG Erlenmeyer Flasks

Corning baffled and plain Erlenmeyer and Fernbach culture flasks are ideal for shaker culture applications and storage. Replacement caps available for 2L, 3L, and 5L flask sizes.

- Polyethylene terephthalate glycol-modified (PETG) construction: USP Class VI material provides excellent optical clarity and mechanical strength
- Sizes range from 2L to 5L
- Baffled or plain bottom options in every size
- Molded-in graduations for accuracy ($\pm 5\%$)
- Vent cap for continuous gas exchange while ensuring sterility and preventing leakage
- Individually packaged
- Sterility Assurance Level (SAL) of 10^{-6}
- RNase-/DNase-free
- Nonpyrogenic

Corning® Volumetric Flasks, PP, Class B

Translucent flask is supplied with tapered polypropylene stopper with an individually calibrated graduation line. The product is manufactured to Class B tolerances as defined by ISO 1042. Exposure to temperatures above 60°C may affect accuracy. Recommended routine cleaning up to 60°C will preserve graduations. Height dimension is for flask only, without stopper.

Corning® External Thread Cryogenic Vials

- Manufactured from polypropylene to withstand temperatures down to -196°C
- Black graduations with large marking spot
- Vials have a silicone washer for a secure seal.
- 2 mL self-standing vials are available in five cap colors
- Vials may be color coded with inserts.
- Self-standing vials have a special base design allowing them to be locked into cryogenic rack and tray (Cat. No. 431131) for single-handed manipulation.
- Free foam rack with each case
- RNase-/DNase-free
- Sterile
- Nonpyrogenic

Warning! Do not use cryogenic vials for storage in the liquid phase of liquid nitrogen. Only store vials in the vapor phase above the liquefied gas. Always use appropriate safety equipment when removing vials from cryogenic storage.

Product Name	Corning® 5 mL External Threaded Polypropylene Cryogenic Vial, Self-Standing with Round Bottom, Cap Unassembled, Unprinted, Bulk
Qty./Pk	125 / Pk
Qty./Cs	500 / Cs

Corning® Cryogenic Vial Racks and Storage Boxes

- Reusable racks are designed for use with most cryogenic vials
- Cat. No. 431131 has a locking feature for use with all Corning self-standing vials
- Cat. No. 431121 accepts internally threaded cryogenic vials only.

Cryogenic Storage Format

1-2 mL Internally-threaded Vials
1-2 mL Vials
4-5 mL Vials

Products

Product Number	431119
Product Name	Corning® Polycarbonate 1 - 2 mL Cryogenic Vial Storage Box, Holds 81 Vials
Qty./Pk	5 / Pk

Corning® CoolRack® Tall Modules

Product Type	
	CoolRack 15 mL
	CoolRack 250 mL
	CoolRack 250 mL PF
	CoolRack 50 mL
	CoolRack L

Cryogenic Storage Format	
	12 x 15 mL centrifuge tubes, light weight insulated module
	12 x 5 mL centrifuge tubes, SBS-compatible
	4 x 50 mL centrifuge tube
	9 x 15 mL centrifuge tube
	One 250 mL centrifuge tube

Products

Product Number	432040
Product Name	Corning® CoolRack XT M24, Holds 24 x 1.5 or 2 mL Microcentrifuge Tubes
Qty./Pk	1 / Pk

PYREX® Beakers, Low Form, Double Scale, Graduated

Beaker, with spout, manufactured with uniform wall thickness, offers optimum balance between thermal shock resistance and mechanical strength. For convenience, the 250 through 4000 mL beakers have a double graduated metric scale to indicate approximate content. All sizes have an extra large marking spot. The 10 mL size is not graduated.

Corning® Reusable Plastic Wash Bottles, Low Density Polyethylene, with PP Screw Cap

These bottles are manufactured from low density polyethylene and are offered with a narrow or wide-mouth. The cap and dispensing tube are manufactured from PP to optimize backflow of the solution. The design allows minimal turbulence of the liquid in the bottle.

Corning® PETG Erlenmeyer Flasks

Corning baffled and plain Erlenmeyer and Fernbach culture flasks are ideal for shaker culture applications and storage. Replacement caps available for 2L, 3L, and 5L flask sizes.

- Polyethylene terephthalate glycol-modified (PETG) construction: USP Class VI material provides excellent optical clarity and mechanical strength
- Sizes range from 2L to 5L
- Baffled or plain bottom options in every size
- Molded-in graduations for accuracy ($\pm 5\%$)
- Vent cap for continuous gas exchange while ensuring sterility and preventing leakage
- Individually packaged
- Sterility Assurance Level (SAL) of 10^{-6}
- RNase-/DNase-free
- Nonpyrogenic

Corning® Disposable Aseptic Transfer Cap for Erlenmeyer Flasks

Aseptic Transfer Caps fit both Polycarbonate (PC) and Polyethylene terephthalate glycol-modified (PETG) Erlenmeyer Flasks. The caps are threaded and made of high-density polyethylene (HDPE).

The transfer caps have two ports: One port ends in a 0.2 µm filter, and the other port is chemically resistant, heat sealable flexible tubing, ending in either a Male Luer Lock or a Male Polycarbonate quick connect. The dip tube reaches all the way to the bottom of the flask for easy aseptic transfer of your liquid handling processes.

- Sizes range from 1L to 5L
- MLL or MPC tubing connector types
- Individually packaged
- Double-bagged
- Sterility Assurance Level (SAL) of 10⁻⁶

Falcon® Containers

- Sterile, disposable polypropylene containers provide secure sample containment
- Available in 4 1/2 oz. (110 mL) and 8 oz. (220 mL) sizes both with and without matching lids
- Feature molded-in graduations for easy measurements
- Graduated in ounces and milliliters to provide convenient, single-use, timesaving containers for collection, transportation, and storage of a wide variety of specimens
- Inert and chemically resistant to commonly used laboratory reagents at room temperature

Features

- Sterile
- 4 1/4 oz. graduations from 1/2 oz. to 4 1/2 oz. in 1/4 oz. increments and from 20 mL to 110 mL in 10 mL increments
- 8 oz. size graduated from 1/4 oz. to 8 oz. in 1/4 oz. increments and from 20 mL to 220 mL in 10 mL increments

Corning® Snap-seal Disposable Plastic Sample Containers

Designed for a wide variety of applications, these containers provide a reliable leak-tight seal when closed properly. The Snap-Seal locking device keeps the cap closed and secure. The specially designed hinged cap stays in place in use, reducing the chance of sample contamination. The containers are made of recyclable polypropylene, in a translucent style for normal usage. The containers are graduated in both milliliters and ounces, and the cap has a rough surface for marking.

Corning® External Thread Cryogenic Vials

- Manufactured from polypropylene to withstand temperatures down to -196°C
- Black graduations with large marking spot
- Vials have a silicone washer for a secure seal.
- 2 mL self-standing vials are available in five cap colors
- Vials may be color coded with inserts.
- Self-standing vials have a special base design allowing them to be locked into cryogenic rack and tray (Cat. No. 431131) for single-handed manipulation.
- Free foam rack with each case
- RNase-/DNase-free
- Sterile
- Nonpyrogenic

Warning! Do not use cryogenic vials for storage in the liquid phase of liquid nitrogen. Only store vials in the vapor phase above the liquefied gas. Always use appropriate safety equipment when removing vials from cryogenic storage.

Corning® BioCoat® Fibronectin-coated Flasks

Human Fibronectin (HFN) is a widely distributed glycoprotein that is used as a substrate to promote attachment of cells through its central-binding domain RGD sequence. HFN is a product of most mesenchymal and epithelial cells and is present in both the ECM and plasma. The principal function of HFN appears to be in cellular migration during wound healing and development, regulation of cell growth and differentiation, and haemostasis/thrombosis.

Applications include:

- Promotion of cell attachment and spreading
- Rapid expansion of cell populations
- Serum-free or reduced-serum culture
- Cell adhesion assays
- Studies of effects of HFN on cell behavior
- Improving survival of primary cells in culture

Source

- Human plasma

NOTE: Source material tested for hepatitis B antigen and HIV-1 antibody

Quality Control

- Tested for ability to promote attachment and spreading of BHK-21 hamster kidney cells
- Tested and found negative for bacteria and fungi
- Fibronectin purity >90% by SDS-PAGE

Storage

- 2°C to 8°C. Do not freeze.

Surface Area

Corning® CoolCell® Containers

Corning CoolCell, in combination with a -80°C freezer, will provide alcohol-free freezing at the rate of -1°C/minute that is ideal for cryopreservation of most cells and cell lines. Using a combination of uniform-density cross-linked polyethylene foam, a solid state core, and radial vial symmetry, freezing profiles are consistent and reproducible. The foam is non-absorbent and will impose negligible change in the freezer environment; thereby protecting nearby frozen samples. The removal of vials is accomplished by tipping the device upside down so the vials slide out.

Features: Unique features of controlled-rate freezing with Corning® CoolCell® include:

- Ease of use
- Alcohol and fluid-free freezing
- Lower cost of use than alcohol-based devices
- High cell recovery and cell viability
- Reproducibility
- Simple, consistent way to standardize controlled-rate freezing

Cryogenic Storage Format

12 x 1 or 2 mL Cryogenic Vials
12 x 3.5 - 5 mL Cryogenic Vials
30 x 1 or 2 mL Cryogenic Vials
12 x 2 mL Serum Vials
6 x 10 mL Serum Vials

Disposable Polyethylene Vent Cap for GL45 Plastic Spinner Flasks, Sterile

Product Number 3567

Disclaimer: This product is not intended to mitigate the presence of microorganisms on surfaces or in the environment, where such organisms can be deleterious to humans or the environment.

These disposable high density polyethylene sterile vent caps contain a 0.2 µm pore hydrophobic PTFE membrane. They are designed to fit the Corning® 500 mL, 1L and 3L Disposable Spinner Flasks (Cat. Nos. 3153, 3561and 3563) for culture applications requiring increased gas exchange. They also fit Corning disposable polystyrene and polycarbonate storage bottles and glass bottles with GL45 threads for applications requiring venting.

- Individually double bagged
- Features large knurls for ergonomic handling
- Sterilized (10⁻⁶ SAL) by gamma radiation; autoclaving is not recommended

Corning® 96 1D/2D Bar Coded Storage Tubes

A System Solution for Automated Sample Management

The 1D/2D storage line offers a superior storage solution designed to provide maximum identification.

- Temperature-resistant polypropylene storage tubes withstand a temperatures range from -100°C to +110°C.
- Maximum identification – Synchronized 2D and linear bar code along with marking spot.
- Maximum information – 14 x 14 dot 2D bar code.
- Bar code stability – Laser-etched for permanent identification.
- Compound compatibility – Universal inert polypropylene construction throughout.
- Nonsterile.

Corning® BioCoat® Collagen I-coated Flasks

Collagen I, found in most tissues and organs, is most plentiful in dermis, tendon, and bone. It is an integral part of the framework that holds cells and tissues together and has been recognized as a useful matrix for improving cell culture. *in vitro* use of collagen can exert effects on the adherence, morphology, growth, migration, and differentiation of a variety of cell types.

Applications include:

- Promotion of cell attachment and spreading
- Rapid expansion of cell populations
- Serum-free or reduced serum culture
- Cell adhesion assays
- Improving survival of primary cells in culture

Source

- Rat tail tendon

Quality Control

- Tested for ability to promote attachment and spreading of HT-1080 human fibrosarcoma cells
- Tested and found negative for bacteria and fungi
- Collagen I purity >90% by SDS-PAGE

Storage

- 4°C to 30°C under dry conditions.

Corning® Easy Grip Polystyrene (PS) Storage Bottles

- Disposable polystyrene bottles for storage of media, buffers, and other aqueous solutions
- Corning low profile style has easy grip sides that facilitate handling
- Plug seal caps (45 mm) provide an airtight seal and help minimize the risk of contamination.
- Bottles can be used with Corning vacuum filtration systems with 45 mm neck sizes (Cat. Nos. 430626, 430627, 431161, 430049, 430513, 430514, 431118, 430015, and 431174).

Corning® PET Media Bottles with Leak-proof Screw Cap Validated Against IATA Standards

Polyethylene terephthalate (PET) bottles are ideal for storage and sampling of media, biologicals, and other aqueous solutions. The PET resin makes the bottle lightweight, break-resistant and as transparent as glass.

Features:

- Packaged in two convenient, shrink-wrapped trays within an outer bag to assure cleanliness
- Break-resistant bottles are an ergonomic and easy to handle alternative to glass
- Bottles are sterilized to 10⁻⁶ SAL and nonpyrogenic
- Leakproof screw cap is validated against IATA standards for air shipments
- Molded graduations for accurate measurements
- USP Class VI compliant bottles are validated noncytotoxic and nonhemolytic

Capacity

PYREX® Disposable Culture Tube, Rimless, Dispenser Pack, and Bulk Pack

These one-use culture tubes are packaged for your convenience in easy-to-open, easy-to-use packs. The three small sizes come in a dispenser arrangement, and the larger sizes are bulk-packed. Made of borosilicate glass to reduce pH changes and contaminants potentially leached from soda-lime glass.

Corning® Polypropylene Closure

These Corning polypropylene closures are designed for culture tubes and flasks with long rimless necks. Closure offers two positions: open for gas exchange or closed for humidified environment. Internal drip ring minimizes contamination. Closures are autoclavable at 121°C.

Closure ending in -25 fits Cat. No. 4442-125.

Closure ending with -38 fits Cat. Nos. 4442-250, 4442-500, 4442-1L, and 4442-2L.

Falcon® Cell Culture Multi-Flasks

- Increase productivity by enabling to grow more cells faster and easier
- 3- or 5-layer formats provide 525 cm² and 875 cm² cell growth surface area, respectively Falcon Cell Culture Multi-Flasks

Features

- Even distribution of media across all layers for homogeneous cell growth
- Ability to mix cells and reagents in the Falcon Multi-Flask saves time and reduces risk of contamination
- Flexible design allows to pour or aspirate/recover cells using a pipet
- Consistent surface treatment for predictable scale-up
- Lot number printed on each flask for traceability
- Manufactured in compliance to cGMP standards

Falcon® Cell Culture Multi-Flasks

- Increase productivity by enabling to grow more cells faster and easier
- 3- or 5-layer formats provide 525 cm² and 875 cm² cell growth surface area, respectively Falcon Cell Culture Multi-Flasks

Features

- Even distribution of media across all layers for homogeneous cell growth
- Ability to mix cells and reagents in the Falcon Multi-Flask saves time and reduces risk of contamination
- Flexible design allows to pour or aspirate/recover cells using a pipet
- Consistent surface treatment for predictable scale-up
- Lot number printed on each flask for traceability
- Manufactured in compliance to cGMP standards

Surface Area

PYREX® Disposable Glass Conical Centrifuge Tubes, Ungraduated, without Screw Cap

These tubes feature more consistent uniform wall thickness, a well formed conical tapered tip, and durable tip radius. The tubes are designed to withstand centrifugation up to 3000 RCF.

Screw caps are sold separately. Product is supplied nonsterile.

For screw caps, see Cat. Nos. 9998-13, 99999-13 to fit Cat. No. 99502-5; see Cat. No. 9998-15, 99999-15 to fit Cat. Nos. 99502-10, 99502-15; see Cat. Nos. 9999-24 to fit Cat. No. 99502-50.

Corning® CoolCell® Filler Vials

Corning CoolCell, in combination with a -80°C freezer, will provide alcohol-free freezing at the rate of -1°C/minute that is ideal for cryopreservation of most cells and cell lines. Using a combination of uniform-density cross-linked polyethylene foam, a solid state core, and radial vial symmetry, freezing profiles are consistent and reproducible. The foam is non-absorbent and will impose negligible change in the freezer environment; thereby protecting nearby frozen samples. The removal of vials is accomplished by tipping the device upside down so the vials slide out.

Features: Unique features of controlled-rate freezing with Corning® CoolCell® include:

- Ease of use
- Alcohol and fluid-free freezing
- Lower cost of use than alcohol-based devices
- High cell recovery and cell viability
- Reproducibility
- Simple, consistent way to standardize controlled-rate freezing

Corning® BioCoat® Laminin Flasks

Laminin (LM), a major component of basement membranes, is a multifunctional glycoprotein that is used as a substrate to culture and maintain differentiated function of a wide variety of cells. Laminin has been shown in culture to stimulate neurite outgrowth, promote cell attachment, chemotaxis, cell differentiation, and neuronal survival.

Applications include:

- Promotion of cell attachment and spreading
- Induction of cell differentiation and neurite outgrowth
- Increases proliferation of myoblasts
- Studies of effects of laminin on cell behavior
- Cell adhesion assays

Source

- Engelbreth-Holm-Swarm (EHS) mouse tumor

Quality Control

- Tested for ability to initiate differentiation (neurite outgrowth) of NG-108 rat glioma/mouse neuroblastoma cells
- Tested and found negative for bacteria and fungi
- Laminin purity >90% by SDS-PAGE (contains entactin)

Storage

- 2°C to 8°C. Do not freeze.

Surface Area

75 cm²

Corning® Coliform Water Test Sample Container, Sterile with Sodium Thiosulfate Tablet

Product Number 1700-100

(This is the suggested replacement for 1700-100B)

These 100 mL capacity Corning containers are used to test for the presence of coliform bacteria, microbiological contaminants in drinking water.

- Capacity: 120 mL total capacity.
- Capacity at line: 100 mL $\pm$ 2.5 mL (2.5%).
- Manufactured from pure polypropylene in a sterile environment and sterile-by-process.
- The one-piece container has attached lid to reduce chance of contamination.
- Locking arrow assures sterility has not been compromised.
- A sodium thiosulfate tablet has been added to each container thus saving lab prep time and expense.
- Leak tight when sealed properly. An added benefit is the tie-down to protect from accidental opening and also serves as a custody seal.
- Sample label and instructions for use are supplied with each.
- A low cost, convenient product which meets EPA requirements.
