Corning® LSE™ Digital Vortexer and Accessories

The Corning Digital Vortexer is a multipurpose shaker dedicated to a variety of shaking and mixing applications. Three easily removable and interchangeable platforms accommodate many different sample containers such as flasks, bottles, tube racks, plates, boxes, and dishes. The clamp platform has spring loaded retaining bars that adjust to fit vessels of different shapes and sizes. The microplate platform is designed to securely hold up to four microplates. Operation of the vortexer can be timed or continuous, while the speed is variable. The broad speed range allows the vortexer to be used for gentle mixing as well as vigorous agitation. A powerful motor, and a chemically resistant and easy to clean surface makes the equipment a perfect choice for years of trouble-free use.

Features and Benefits

- Three versatile platform options (available separately)
- Compact design with easy-access control panel
- Non-slip rubber mat to keep containers in place
- Safe for cold room or incubator use
- Five-year warranty

Voltage

	115V, 60 Hz
	230V, 50Hz

Corning® LSE™ Orbital Shaker

The Corning LSE orbital shaker meets a variety of shaking and mixing applications. A powerful brushless motor and counter-balanced shaker mechanism provides smooth operation for years of trouble-free use. Different platforms (order separately) are available and are easily interchangeable.

- Two stainless steel platform options
- 19 mm orbit for aeration of cultures and staining gels
- Large digital display with single-knob control
- Digital control of shaking speed and time
- Safe for cold room or incubator use
- Maximum capacity: 4 x 1L, 5 x 500 mL, 9 x 250 mL, or 16 x 125 mL

Corning® LSE™ Nutating Mixer

The Corning® LSE™ Nutating Mixer is a compact mixer that combines the motion of an orbital shaker and a platform rocker to produce a continuous three dimensional agitative gesture. The output demonstrates a thorough yet gentle mix without foaming. The pitch and speed of the Corning Nutating Mixer are designed to provide the optimal motion for mixing and resuspending samples in small volume vessels such as blood and centrifuge tubes. The dimpled mat on the platform surface holds tubes firmly in place while the unit is powered on.

- Small footprint
- Cold room compatible
- Dimpled Mat
- 3D motion is ideal for mixing and resuspending samples

Corning® LSE™ Vortex Mixer

The Corning LSE variable speed vortex mixer provides fast, efficient mixing with minimal vibration. The unit features a powerful, counter-balanced motor drive, and continuous or “touch” mix modes. A range of accessories are available for all common sample tubes and containers.

- Variable speed for gentle to vigorous mixing
- Optimized counter balance for minimal vibration
- Lightweight and portable
- Includes cup head for all standard microtubes and centrifuge tubes
- Mix a variety of tubes and plates with optional accessory heads
- Touch and continuous mix modes

Corning® LSE™ Digital Microplate Shaker

The Corning LSE digital microplate shaker features digital control of shaking speed and run time. A single control knob is used to set parameters, and values are shown on a large 3-digit display. A sturdy base encloses the motor for quiet, vibration-free operation.

The included stainless steel platform accommodates up to 4 microplates (standard or deep well), and the shaker is safe for use in temperature controlled environments from 4°C to 65°C.

- Large capacity – process up to 4 microplates
- 3 mm orbit for resuspending, homogenizing, or vortexing
- Large digital display with single-knob control of speed time
- Suitable for cold room or incubator use

Corning® LSE™ Mini Microcentrifuge

The Corning LSE mini microcentrifuge is a personal benchtop instrument designed for quick spin downs of micro-samples. Operation is simple and convenient. After loading sample tubes, close the lid and the rotor accelerates quickly to 6,000 rpm (2,000 x g). This speed range is ideal for bringing small droplets to the bottom of the tubes, micro-filtrations, or basic separations. Press the lid release button and rotor comes to a stop.

The LSE mini microcentrifuge includes an 8-place rotor that will accept standard 1.5 mL to 2.0 mL microcentrifuge tubes, and adapters are included for 0.5/0.4 mL and 0.2 mL tubes. Also included is a 4-place rotor for PCR strip tubes.

- Compact, lightweight, and easy-to-use
- Close the lid to start, press the lid release button to stop
- 8 x 1.5/2.0 mL rotor and 4-place strip tube rotors included
- Fixed speed of 6,000 rpm generates 2,000 x g.

Corning® LSE™ High Speed Microcentrifuge

The Corning LSE high speed microcentrifuge features an easy-to-use, digital control interface, and high-speed performance for quick nucleic acid and protein separations. Two control knobs are used to precisely set rotor speed and run time, and parameters are shown on the easy-to-read LED displays. Press the “Speed/G-force” knob to toggle the display between rpm and calculated g-force.

The LSE high speed microcentrifuge incorporates a brushless drive and unique air cooling system to both reduce noise and minimize sample heating even during prolonged runs at maximum speed.

- Fast acceleration to a maximum speed 13,300 rpm/16,300 x g
- Complete with easy access, 24 x 1.5/2.0 mL rotor; Precise, digital control system
- Set and view rotor speed in rpm or g-force
- Quiet and cool running, even at maximum speed

Corning® LSE™ Compact Centrifuge

The Corning LSE compact centrifuge is a space saving centrifuge ideal for use in life science and industrial research labs.

Four angle rotors are available for this centrifuge, including an innovative combination rotor designed by Corning to allow for greater versatility. This multi-purpose rotor can accommodate various tube sizes including a 5 mL microcentrifuge tube, as well as round and conical bottom 15 mL and 50 mL centrifuge tubes. Tubes are inserted at an increased fixed angle to allow for improved efficiency of cellular pelleting. An equal g-force is applied to the samples when spinning 15 mL and 50 mL tubes simultaneously. In addition, the LSE compact centrifuge can accommodate a swing-out rotor for 6 x 5 mL.

The centrifuge's control panel features a large digital display and a convenient turn knob for setting parameter values. An internal microprocessor maintains precise control over operation with ten levels of acceleration and deceleration and a speed range from 200 rpm to 6,000 rpm. For safety considerations, the centrifuge is equipped with an electronic lid lock system, over speed protection, and an automatic shut off imbalance detection system.

- Maximum capacity: 6 x 50 mL
- Maximum speed: 6,000 rpm/4,185 x g
- Accepts both conical and round bottom tubes
- Space saving footprint: 11 x 14.6 x 10 in.

Axygen® Axyspin Refrigerated Microcentrifuge

The Axxygen Axyspin refrigerated microcentrifuge is a high performance refrigerated microcentrifuge designed to quickly process samples for applications such as nucleic acid and protein preparation, purifications, extractions, and pelleting.

- Powerful refrigeration system cools to 4°C in 8 minutes
- 24 x 1.5/2.0 mL aluminum rotor included
- Exceptionally quiet and compact

The Axxygen Axyspin refrigerated microcentrifuge combines a powerful yet silent, brushless drive with an efficient cooling system, all in a compact footprint. Brushless drive technology has been fine-tuned in the Axyspin refrigerated microcentrifuge to deliver fast acceleration and deceleration of the solid aluminum rotor. The uniquely designed 24-place rotor allows easy access to the tops of sample tubes. Starting from room temperature, the chamber of the Axyspin refrigerated microcentrifuge cools to 4°C in just 8 minutes. The control panel features a backlit LCD display, which allows users to easily view running parameters while the large control knob facilitates digital setting of rotor speed, run time, and temperature. These high performance features allow for faster sample processing and less down time.

The rotor of the Axyspin refrigerated microcentrifuge can accommodate 1.5 and 2.0 mL Axxygen microcentrifuge tubes, including the most popular catalog numbers (MCT-150-C and MCT-200-C).

Corning® LSE™ Digital Dry Bath Heater

The Corning Digital Dry Bath Heaters are available in single, dual, and four block configurations and provide a broad temperature range up to 150°C, which makes them useful for a variety of applications in molecular biology, histology, clinical, environmental, and industrial laboratories. They have been designed to incorporate the best combination of features including block capacity, dual displays, and an external temperature probe that gives life science researchers the confidence and efficiency they need when working with precious samples.

- Single, dual, and four block capacity to maximize sample processing
- Dual display allows for easy monitoring of temperature and time
- USB connectivity enables traceability of data
- Molded block chamber provides excellent temperature uniformity

Corning® LSE™ 6 Liter Digital Water Bath

The Corning LSE Digital Water Bath is constructed from corrosion-resistant stainless steel and can accommodate up to 6 liters of water or can serve as a dry bath when using thermal beads.

- Compact design
- Stainless steel cover to retain heat and minimize evaporation
- Powerful 500W heater programmed by LED digital controller
- Precise temperature control by hydraulic thermostat

Corning® Digital Stirring Hot Plates

Corning digital hot plates, stirrers, and stirring hot plates are made with the same durability and quality Corning has been putting into Pyroceram® top products since 1964. All models include a Pyroceram top and a two-year warranty.

- Twin display stirring hot plate shows both temperature and stirring speed on separate digital displays to ensure accuracy. Accuracy within $\pm 2^{\circ}\text{C}$ and stirring speeds at $\pm 5\%$ of the speed setting you choose
- Digital displays indicate when set temperature and stirring speeds are reached
- Safety indicators – power button and hot top indicators warn if unit is plugged in or is too hot to touch
- Angled front panel and large knobs minimize damage from spills
- PC-400D/410D/420D top plate size: 5 x 7 in. (12.7 x 17.8 cm)
- PC-600D/610D/620D top plate size: 10 x 10 in. (25.4 x 25.4 cm)

Corning® Magnetic Stir Bar Retriever

Product Number 6970SR

The Corning stir bar retriever contains a strong magnet to remove a stir bar from all glass and plastic containers used in the laboratory. The container must be taken off the magnetic stirrer before using the retriever as the high powered magnet in the stirrer cancels out the one in the retriever. The handle is designed for ergonomic and easy retrieval. -The retriever is available one per case.

Corning® Digital Display Hot Plate and Stirring Hot Plate Accessory Kit

Product Number 6795KIT

This accessory kit is designed for all Corning digital display hot plates and stirring hot plates (Models PC-400D, PC-420D, PC-600D, PC-620D).

This Corning® kit Cat. No. 6795KIT includes:

- Cat. No. 6795PR, external temperature controller
- Cat. No. 440129, vertical support rod. Supplied as two 9 inch (22.9cm) support rods that can be screwed together (18 inches)
- Cat. No. 6970SR, stir bar retriever

Available for purchase separately and not included in the kit:

- Cat. No. 440140, boss head clamp
- Cat. No. 440141, holding rod

Axygen® Horizontal Gel Boxes

Axygen horizontal gel boxes are high-quality, full-featured units designed for exceptional durability and efficiency. The gel boxes feature leak-free external gel casting, which allows you to cast one gel outside of the box while another gel is running inside. The units are available in four different sizes, and each unit comes with two sizes of gel trays. In addition, they have easy to replace electrodes that are recessed to reduce potential damage. These gel boxes are an excellent value that will provide years of reliable service.

Features

- Flexibility – Each unit comes with 2 sizes of gel trays to optimize applications
- External gel casting to gel box allows for running gels while casting the next one
- Ease of use – the Axxygen contrast enhancer makes loading gels easier
- Rugged injection molding is supported by a 3-year warranty
- Larger units come with recirculation ports allowing for buffer exchange

Four sizes of horizontal tanks. Each comes with 2 sizes of gel trays which allow for external gel casting. Three larger sizes come with recirculation ports for use as needed.

Axygen® Power Supplies

The Axxygen Power Supplies are full-featured power sources ideal for molecular biology workflows including DNA and protein gel applications. The compact user interface has 4 sets of color-coded terminals allowing for use with up to 4 gel boxes simultaneously. Depending on the model, operating modes include constant voltage, current, or power all with automatic crossover feature. The PS300GP can be quickly programmed to run with the easy to set digital display. The PS250HA has the ability to set programs with 10 steps per program. Both units have timers.

Ideal for most of your electrophoresis needs.

Axygen® MaxyGene II Thermal Cycler

The Axxygen MaxyGene II Thermal Cycler replaces our successful and reliable MaxyGene. It brings increased speed and advanced features, providing the premium performance you have come to expect from Axxygen brand products.

- Unique flexible programming
- Rapid run times
- Improved workflow over traditional gradient cyclers
- Ramping rates up to 5°C/sec.
- Simple user interface
- Adjustable heated lid accommodates strips, tubes and microplates
- Pre-programmed standard protocols
- 3-year warranty

Axygen® Gel Documentation System

Product Number GD-1000

Axygen® Gel Documentation systems easily capture publication quality, 16 bit TIFF images. The systems are quick to set up and have an intuitive user interface for image capture, annotation, and contrast adjustment. Images are easily saved and opened in common gel analysis software for more detailed analysis.

- Auto exposure—you never have to manually manipulate the camera
- Ready-to-use—just connect the computer (computer not included) and load the software
- Long-life dual wavelength transilluminators
- Exceptionally high resolution (5.4 MP) camera
- The cabinet is compact with an ultra-violet (UV) cut-off switch to prevent exposure to UV light if the cabinet door is opened while the UV light is on.

Features

- Darkroom tab lets you select from UV 302, UV 365, Epi White, or Epi Blue (BL system only) light sources, as well as an optional Trans White light illumination tray.
- Auto Exposure tool calculates the optimal exposure time with just a single click. You can also use the Slider tool to manually adjust the exposure time and view an updated live image.
- Select ROI tool allows you to select a region of interest. The Auto Exposure calculations are only based on the selected region. This feature is especially useful for gels that have either intense or faint bands.
- Band Excision tool allows you to temporarily override the safety precautions in the system to view the gel with the lights on.**
- Imaging tools include crop, rotate, resize, contrast, saturation, and zoom. Annotation tools include a variety of text and drawing tools. Finished images can be saved, printed, emailed, or exported for further analysis.
- Transillumination bulbs last for 30,000 hours—which equals over 3.5 years if the bulbs were in continuous use.
- ** Always wear protective eyewear when working with UV light.
- **Camera:** 5.4 MP image resolution
- **Lens:** f1.8
- **Light Sources:** Epi White, Dual wavelength transillumination at 302 nm
- **Trans White Light Illumination Tray:** Optional
- **Field of View:** 15 cm x 20 cm
- **Cabinet:** • Door sensor to prevent accidental exposure to UV; automatically shuts off UV light when door is open; • Safety override, enabling band cutting on the UV transilluminator with automatic turn off after 5 minutes
- **Emission Filter:** 590 nm
- **3-position Filter Slider:** No
- **Certifications:** CE, cTUVus
- **Product Footprint:** 12 (30.48 cm x 38.1 cm)
- **Computer:** • Operating system: Microsoft® Windows® 7 or higher; • Minimum hardware requirements: Intel® processor, 1.4 GHz processor speed, 2GB RAM, 16GB free hard disk space, 2 USBs

- Ready-to-use—just connect the computer* and load the software
- Long-life dual wavelength transilluminators
- Exceptionally high resolution (5.4 MP) camera
- The cabinet is compact with an ultra-violet (UV) cut-off switch to prevent exposure to UV light if the cabinet door is opened while the UV light is on.

Features

- Darkroom tab lets you select from UV 302, UV 365, Epi White, or Epi Blue (BL system only) light sources, as well as an optional Trans White light illumination tray.
- Auto Exposure tool calculates the optimal exposure time with just a single click. You can also use the Slider tool to manually adjust the exposure time and view an updated live image.
- Select ROI tool allows you to select a region of interest. The Auto Exposure calculations are only based on the selected region. This feature is especially useful for gels that have either intense or faint bands.
- Band Excision tool allows you to temporarily override the safety precautions in the system to view the gel with the lights on.**
- Imaging tools include crop, rotate, resize, contrast, saturation, and zoom. Annotation tools include a variety of text and drawing tools. Finished images can be saved, printed, emailed, or exported for further analysis.
- Transillumination bulbs last for 30,000 hours—which equals over 3.5 years if the bulbs were in continuous use.
- ** Always wear protective eyewear when working with UV light.
- **Camera:** 5.4 MP image resolution
- **Lens:** f1.8
- **Light Sources:** • Epi White; • Dual wavelength transillumination at 302 nm and 365 nm; • Epi Blue
- **Trans White Light Illumination Tray:** Optional
- **Field of View:** 15 cm x 20 cm
- **Cabinet:** • Door sensor to prevent accidental exposure to UV; automatically shuts off UV light when door is open; • Safety override, enabling band cutting on the UV transilluminator with automatic turn off after 5 minutes
- **Emission Filter:** 590 nm
- **3-position Filter Slider:** No
- **Certifications:** CE, cTUVus
- **Product Footprint:** 12 (30.48 cm x 38.1 cm)

- **Computer:** Tablet included: Windows 8 tablet computer enables compatibility with existing networks, as well as easy setup; • Bluetooth and wireless compatible, or USB to LAN compatible; • 10.1 touch screen; • 2GB of storage for short term data saving

Corning® Vacuum Aspirator

Product Number 4930

The Corning® Aspirator is a device using vacuum to safely and aseptically dispose of supernatant from a variety of laboratory vessels. The aspirator includes a hand piece to which disposable pipet tips are attached during use, a grommet for accessory attachment and single-channel adapter for disposable pipet tips.

An 8-channel adapter is available for working in 96 well plates, see No. 4931. **Refer to the accessories tab below.**

Compatibility	2 mL pipets , 1 - 200 µL disposable pipet tips

Axygen® Axypet® Single- and Multi-channel Pipettors

High levels of accuracy and precision with design innovations to make pipetting more comfortable during prolonged periods of time.

- Some are ISO 17025 Pre-calibrated
- Thumb-friendly soft spring pipetting system reduces fatigue
- Unique side EZIject button option reduces thumb movement (Left handed EZIject button available by special order).
- Finger-hook provides for a more relaxed grip
- Large ergonomic push button is easy on the thumb during contact
- Locking feature prevents accidental volume changes during pipetting procedures

Additional multi-channel pipettor features:

- Push button and ejector button are ergonomically located
- Curved ejector bar allows tips to be ejected in steps, reducing the mount of force required for ejection
- Tip manifold rotates 360°
- Each channel of the pipettor has an individual, precision piston assembly to ensure accuracy and reproducibility from one pipetting series to the next
- Shafts withdraw when pressed against a row of tips
- Each shaft moves independently, minimizing jamming of tips
- Micrometer is continuously adjustable for selection of whole or fractional volumes

Corning® Lambda™ Plus Single- and Multi-channel Pipettors

Engineered to provide the highest levels of accuracy, reproducibility, and comfort

Available in single-, eight-and twelve-channel configurations, all Lambda Plus pipettors feature smooth plunger movement and extremely low pipetting forces. Volume can be set by turning either the thumb wheel or the plunger button, and a locking mechanism prevents accidental change. The Lambda Plus pipettors have been designed to maintain their calibration, even after repeated use and autoclaving. A key is included with each pipettor for easy in-house calibration.

Features

- Factory calibrated to strict ISO 8655 standards-3-year warranty
- Fully autoclavable and UV resistant
- Designed for universal fit with all common brands of pipet tips
- Adjustable tip ejector

Corning® Lambda™ EliteTouch™ Single- and Multi-channel Pipettors

Corning® Lambda™ EliteTouch™ pipettors have been engineered to provide the highest levels of ergonomics, accuracy, and precision. Lightweight construction, contoured shape of the handle, and 4-digit counter were designed to ensure comfortable pipetting. All pipettors feature smooth plunger movement and extremely low pipetting forces to reduce the wrist strain and fatigue (RSI). Colored pushbuttons (included) can help define user or application for sample safety and lower risk of cross contamination.

- Ergonomic handle design for perfect fit for both right and left hand
- Convenient one-hand volume setting with auto-lock system prevents accidental volume change during work
- 4-digit counter for greater precision, perfectly positioned for visibility at all times
- Single-channel pipettors are compatible with very narrow tubes
- Fully autoclavable and UV-resistant for sample protection against contaminations
- The multi-channel shafts retract individually for perfect tip loading and easier tip ejection
- Easy in-lab calibration helps you quickly adjust your pipettor to various liquid types
- Individually tested and supplied with a certificate of quality

Falcon® Pipet Controller

The light, ergonomic, motorized pipet controller

Designed for use with glass and plastic serological pipets from 0.5 to 100 mL volume ranges.

Conveniently positioned switches change operating modes and speeds quickly to handle different liquid volumes and viscosities. Aspirating and dispensing speed is controlled through the finger triggers. When fully charged, the batteries enable up to 8 hours of continuous use. The large LCD display clearly indicates battery status, pipetting mode and speed.

The Falcon Pipet Controller is supplied with:

- Two-position charging stand
- Universal battery charger
- Three batteries
- Two 0.2 μm and two 0.45 μm hydrophobic
- Polytetrafluoroethylene (PTFE) filters

Additional filters are available as standard accessories. The filters, pipet holder and nosepiece are autoclavable.

Features

- Ergonomic design for exceptional comfort
- LCD display for continuous visualization of speed, modes and battery status
- Easy access to the battery compartment
- Easy maintenance

Corning® Stripettor™ Ultra Pipet Controller

Product Number 4099

(This is the suggested replacement for 4090, 4091, 4092, 4093, 4097, 4098)

This light, ergonomic, motorized pipet controller is designed for use with glass and plastic serological pipets from 0.5 to 100 mL. Conveniently positioned switches change operating modes and speeds quickly to handle different liquid volumes and various viscosities. Aspirating and dispensing speed is controlled through the finger triggers. When fully charged, the batteries enable up to 8 hours of continuous use. The large LCD display clearly indicates battery status, pipetting mode, and speed.

- LCD display for continuous visualization of speed, modes, and battery status
- Colored nose pieces for user or application identification
- Well positioned function buttons
- 3-position charging stand

Corning Stripettor Ultra Pipet Controller comes with a universal power supply, three 0.2 µm filters, 3 colored nose pieces, a wall hanger, and a charging stand.

Axygen® MotoPet® Pipet Controller

Product Number MOTOPET-1

Axygen® MotoPet® is a precise, motor powered, rechargeable pipet controller for volumes ranging from 0.5 mL to 100 mL. The unit has an ergonomic design and a highly efficient motor for fast aspiration and dispense of samples as large as 100 mL and full control and precision while dispensing volumes as small as 0.5 mL. It is compatible with both glass and plastic pipets.

Features

- Molded, lightweight handle for effortless pipetting even during extended use.
- Easily accessible switches allow you to choose the optimal operation mode depending on the volume and viscosity of the sample.
- PTFE filter prevents liquid from entering the unit and protects samples from cross-contamination.
- Digital display provides visual indication of battery condition, motor speed, and operating function.
- Pressure sensitive trigger buttons control rate of aspiration or dispensing.
- Aspiration speed can be set to HIGH or LOW to adjust for the volume of the pipet and viscosity of the liquid.
- Dispensing Modes: 2 (gravity and blow-out).
- Power Source: NiMH battery, up to 8 hours of continuous work
- Sterilization: Nosepiece, pipet holder, and filter are autoclavable.

The Axxygen Axypet Starter Kit contains: AP-20, AP-200, and AP-1000 pipettors; 1 rack each of 200 µL and 1000 µL Axxygen tips; calibration tool; ejector spacers set; identification labels; lubricant; color identification rings; right-hand ejector button

- Cat. No. AP-20 Axxygen Axypet single channel Pipettor 2 to 20 µL
- Cat. No. AP-200 Axxygen Axypet single channel Pipettor 20 to 200 µL
- Cat. No. AP-1000 Axxygen Axypet single channel Pipettor 100 to 1,000 µL
- 1 rack each of 200 µL and 1000 µL Axxygen tips

Corning® Lambda™ Plus Starter Kit

Product Number 4069

The Lambda Plus Starter Kit is designed for laboratories which are about to replace their old set of pipettors, and for customers who want to get a new set of pipettors which cover the most commonly used volumes.

The Lambda Plus Starter Kit contains: four Lambda Plus Single-Channel pipettors conveniently packaged with useful accessories (manual, calibration key, color-coded rings, tube of piston grease and identification stickers).

- Lambda Plus Single-Channel pipettor:
 - 0.5 to 10 µL (Cat. No. 4071)
 - 2 to 20 µL (Cat. No. 4072)
 - 20 to 200 µL (Cat. No. 4074)
 - 100 to 1000 µL (Cat. No. 4075)
- Universal carousel rack for six single-channel pipettors
- Corning DeckWorks™ Pipet Tips:
 - 10 µL (Cat. No. 4135)
 - 200 µL (Cat. No. 4138)
 - 1000 µL (Cat. No. 4140)
- Free Gift - 1 Corning insulated lunch bag

Axygen® Axypet® Starter Kit-2

Product Number AP-STR-KIT-2

The Axxygen Axypet Starter Kit contains: AP-10, AP-100, and AP-1000 pipettors; 1 rack each of 10 µL, 200 µL, and 1000 µL Axxygen tips; calibration tool; ejector spacers set; identification labels; lubricant; color identification rings; right-hand ejector button

- Cat. No. AP-10 Axxygen Axypet single channel Pipettor 0.5 - 10 µL
- Cat. No. AP-100 Axxygen Axypet single channel Pipettor 10 - 100 µL
- Cat. No. AP-1000 Axxygen Axypet single channel Pipettor 100 to 1,000 µL
- 1 rack each of 10 µL, 200 µL, and 1000 µL Axxygen tips

Corning® Lambda™ EliteTouch™ Starter Kit

Product Number 6065

Corning Lambda EliteTouch Starter Kit contains 4 variable volume pipettors in the most popular and universal volumes (0.5-10 µL, 2-20 µL, 20-200 µL, and 100-1000 µL), pipet stand for 4 pipettors, 3 racks with tips, and accessories.

- Cat. No. 6051 Lambda™ EliteTouch™ Single-channel pipettor, 0.5 to 10 µL
- Cat. No. 6052 Lambda EliteTouch Single-channel pipettor, 2 to 20 µL
- Cat. No. 6055 Lambda EliteTouch Single-channel pipettor, 20 to 200 µL
- Cat. No. 6056 Lambda EliteTouch Single-channel pipettor, 100 to 1000 µL
- Cat. No. 6066 Universal linear stand for four single-channel pipettors
- Cat. No. 4134 (10 µL) Corning DeckWorks pipet tips
- Cat. No. 4138 (200 µL) Corning DeckWorks pipet tips
- Cat. No. 4140 (1000 µL) Corning DeckWorks pipet tips
- 3 colored pushbuttons (4 sets)

Corning® Bottle Top Dispenser

Safe and Precise Dispensing with No Loss of Reagent

Safe and Precise Dispensing with No Loss of Reagent

The Corning Bottle Top Dispenser is a universal solution for dispensing organic and inorganic liquids. The specialized air-purging and closed circuit system ensures no loss of reagent during dispensing, as well as when the device is not in use.

The bottle top dispenser comes with 4 adapters with different diameters for universal use with multiple bottle sizes. The telescopic suction tube can be adjusted smoothly to different bottle heights. The calibration tool allows easy in-lab calibration with a built-in recalibration mechanism to ensure the highest reproducibility during the dispenser's long life cycle.

Every dispenser is individually tested and delivered with a certificate of performance. Corning Bottle Top Dispensers are suitable for using with a wide range of chemical solutions.

Corning® Cell Counter | Automated Cell Counter | Corning

Time-saving Technology using the Power of the Cloud

Time-saving Technology using the Power of the Cloud

For years, the choice between manual and automated cell counting has been a difficult one. Manual cell counting can be accurate, but time-consuming and user-dependent. Automated cell counting is much faster and less user-dependent, but the cost of disposable counting slides can be an issue. A tough choice, but now there is an affordable solution.

The Corning Cell Counter is the first automated cell counter that combines the best of both worlds. It is:

- Evolving – periodic, seamless upgrades, added features, and improved functionality.
- Accurate – thanks to its cloud-based machine learning algorithm.
- Improved resolution – ability to accurately count as small as 4 μm (e.g., PBMC).
- Low-cost – works with common reusable glass hemocytometers. No consumables required.
- Fast – thanks to its online image processing.

Other Advantages

Easy to use – The Cell Counter is easy to use. Simply connect the Cell Counter to your computer or tablet and start the CytoSMART Cloud App. Place the loaded counting chamber on the stage. Focus on your cells and press the Count button. The simplicity of the Cell Counter allows anyone working in your lab to easily count cells without the need of extensive training.

Accessible Data Anywhere, Anytime – With the Corning Cell Counter summary reports are instantly generated with every count; exportable on your computer and automatically saved to the CytoSMART Cloud, enabling you to access the analyzed images and cell counts remotely on your smartphone, tablet, or computer without running out of storage space. Since all data is saved in the CytoSMART Cloud, you can gain insight into the health and quality of your cell culture from one experiment to the next by batch exporting all the counts in your specific research experiment.

Requirements to use Corning Cell Counter:

- Windows 10 Tablet or PC
- High speed internet/cloud access
- USB 3.0 Port
- Mammalian cells 4 to 70 μm

The new Corning Cell Counter is the first cell counter that combines the best features of automated and manual cell counting. It is fast, accurate, and affordable.

Corning® Matribot® Bioprinter

Accelerate Development and Streamline the Workflow of 3D Models

Introducing the Corning Matribot bioprinter, a breakthrough device that enables dispensing and printing with Corning Matrigel® matrix, Collagen, and other temperature-sensitive hydrogels without the need for cold blocks, ice buckets, or a cold room. It can also be used to bioprint with hydrogels that need ambient temperature such as alginate-based bioinks.

The Corning Matribot bioprinter is the first benchtop bioprinter designed to handle Corning Matrigel matrix using a revolutionary cooling syringe printhead technology that allows you to biodispense 3D droplets or droplet arrays for organoid applications. The system also allows you to bioprint layered geometries with various other extracellular matrices to better emulate *in vivo* environments for 3D cell culture functions that are advancing the industry and modern therapeutics in critical areas.

The Corning Matribot bioprinter delivers a flexible, easy-to-use, semi-automated solution that reduces manual inconsistencies; all in a small footprint, enabling sophisticated drug discovery and toxicology research for future personalized therapeutics.

Dispense and Print Corning Matrigel Matrix

The first benchtop device to dispense and print Corning Matrigel matrix – and other ECM hydrogels – with ease. Learn more about the features, benefits, and ordering information for the Matribot bioprinter.

Corning® Pluronics Sacrificial Ink

Product Number 6157

Corning Pluronics sacrificial ink (40%) is a ready-to-print sacrificial and support ink that exhibits excellent printability. It is easy to remove once printed by washing with cold PBS. Pluronics sacrificial ink has been used for the fabrication of vascularized tissues, channels in microfluidic devices, and supporting scaffolds for complicated tissue constructs.

Corning Pluronics sacrificial ink can also be diluted to 25% v/v with water and used as a learning tool to mimic dispensing of temperature-sensitive hydrogels. For more information, refer to the Pluronics dispensing document.

Details

Product Number	6157
Qty./Pk	5 / Pk
Qty./Cs	1 / Cs
Brand	Corning®
Size	2.7ml/Syringe
Formulation	SDS Available

Storage Recommendation	4 - 8°C
Quality	Sterile-A
Protein Concentration	40%
Usage	Syringe
Surface Category	Synthetic Hydrogel (ECMs)
Packaging Configuration	5 Syringes/Bag
Color	Transparent

Corning® Start Sacrificial Ink

Product Number 6159

Corning Start sacrificial ink is a water-soluble gel used as a sacrificial material and ink for educational purposes. Ideal for evaluating the printing of complex structures, prior to printing with human cells.

Corning® Lambda™ EliteMax Semi-automated Benchtop Pipettor

High throughput automation with a small footprint

Introducing the Corning Lambda EliteMax Benchtop Pipettor, a semi-automated, affordable, and easy-to-use liquid handler for lab benches that are tight on space but require the power and ability to perform high content screenings for large volumes of assays. The Corning Lambda EliteMax Semi-automated Benchtop Pipettor can perform a variety of liquid handling tasks including:

- Plate filling from reagent reservoirs

- Serial dilutions, plate-to-plate transfers, tube-to-tube transfers, and plate replication

- Well-to-well transfers (cherry picking protocol for single-channel head only):

Unit comes with a single-channel and 12-channel head installed.

- Accurately and precisely transferring liquids and compounds between microplates

- Transferring by row or by column

Additional complex applications can be performed such as sample preparation, timed reaction, PCR preparation, cell-based assays set up
