Qty./Pk	14 / Pk
Qty./Cs	252 / Cs

Corning® Treated Culture Dishes

- Corning® CellBIND® surface is a novel cell culture treatment that increases surface wettability for more even and consistent cell attachment
- Ultra-Low Attachment surface dishes feature a covalently bound hydrogel layer that minimizes cell attachment, protein absorption, and cellular activation
- 10 dishes/bag are available for 100 mm dishes (Cat. No. 430293)
- 245 mm square dishes offer 500 cm² growth surface
- Stacking beads aid in handling
- Vents provide consistent gas exchange
- Manufactured from optically clear virgin polystyrene
- Sterile
- Nonpyrogenic

Dish style (mm) = actual growth surface diameters: 35 mm dish = 34.4 mm; 60 mm dish = 52.1 mm; 100 mm dish = 83.8 mm; 150 mm dish = 139.1 mm.

Cat. no. 431110, Square dishes with interior bottom dimensions of 224 x 224 mm.

Falcon® Cell Culture Dishes

- Flat, optically clear polystyrene surfaces for distortion-free microscopic visualization of cells
- Uniform surface chemistry created by vacuum-gas plasma treatment promotes cell attachment
- Improved handling of small dishes with the unique Easy-Grip design
- Nonpyrogenic
- Sterilized by gamma irradiation
- Packaged in peel-open, medical-style bags
- Crystal-grade virgin polystyrene
- Standard Tissue Culture (TC), Corning® Primaria™ surface treatment and non-TC-treated polystyrene available

Designed for cell culture

- Flat, distortion-free optics
- Lids designed for optimal gas exchange
- Stacking rings allow for easier stacking and handling
- Vacuum-gas plasma treatment permanently and consistently modifies the cell growth surface
- Standard tissue culture surface is hydrophilic and contains a variety of negatively charged functional groups that support cell attachment and spreading
- Corning Primaria tissue culture surface additionally incorporates nitrogen-containing functional groups and has been shown to support improved attachment, spreading, and differentiation of some cell types

Corning® 245mm Square BioAssay Dishes

Square bioassay dishes are made from polystyrene and are nonpyrogenic. They are packed with lids and are designed with a stacking bead so that they will stack securely without slipping. The dishes are compatible with automated colony picking instruments.

Falcon® *in vitro* Fertilization (IVF) Dishes and Plate

Falcon *in vitro* Fertilization (IVF) products are the first plasticware available that is sterile, nonpyrogenic and nonembryotoxic. These qualified products save you time and expense in complying with the College of American Pathologists (CAP) and American Fertility Society (AFS) recommended standards for IVF labs.

Falcon® Containers

- Sterile, disposable polypropylene containers provide secure sample containment
- Available in 4 1/2 oz. (110 mL) and 8 oz. (220 mL) sizes both with and without matching lids
- Feature molded-in graduations for easy measurements
- Graduated in ounces and milliliters to provide convenient, single-use, timesaving containers for collection, transportation, and storage of a wide variety of specimens
- Inert and chemically resistant to commonly used laboratory reagents at room temperature

Features

- Sterile
- 4 1/4 oz. graduations from 1/2 oz. to 4 1/2 oz. in 1/4 oz. increments and from 20 mL to 110 mL in 10 mL increments
- 8 oz. size graduated from 1/4 oz. to 8 oz. in 1/4 oz. increments and from 20 mL to 220 mL in 10 mL increments

Corning® Snap-seal Disposable Plastic Sample Containers

Designed for a wide variety of applications, these containers provide a reliable leak-tight seal when closed properly. The Snap-Seal locking device keeps the cap closed and secure. The specially designed hinged cap stays in place in use, reducing the chance of sample contamination. The containers are made of recyclable polypropylene, in a translucent style for normal usage. The containers are graduated in both milliliters and ounces, and the cap has a rough surface for marking.

Corning® Coliform Water Test Sample Container, Sterile without Sodium Thiosulfate Tablet

Product Number 1705-100

These 100 mL capacity Corning® containers are used to test nonchlorinated drinking water.

- Does not contain a sodium thiosulfate tablet. Manufactured from pure, recyclable polypropylene.
- Capacity: 120 mL total capacity.
- Capacity at line: 100 mL $\pm$ 2.5 mL (2.5%).
- The one-piece container has attached lid to reduce chance of contamination.
- Locking arrow assures sterility has not been compromised.
- Leak tight when sealed properly. An added benefit is the tie-down which protects against accidental opening.
- Sterile-by-process

Corning® Coliform Water Test Sample Container, Sterile with Sodium Thiosulfate Tablet

Product Number 1700-100

(This is the suggested replacement for 1700-100B)

These 100 mL capacity Corning containers are used to test for the presence of coliform bacteria, microbiological contaminants in drinking water.

- Capacity: 120 mL total capacity.
- Capacity at line: 100 mL $\pm$ 2.5 mL (2.5%).
- Manufactured from pure polypropylene in a sterile environment and sterile-by-process.
- The one-piece container has attached lid to reduce chance of contamination.
- Locking arrow assures sterility has not been compromised.
- A sodium thiosulfate tablet has been added to each container thus saving lab prep time and expense.
- Leak tight when sealed properly. An added benefit is the tie-down to protect from accidental opening and also serves as a custody seal.
- Sample label and instructions for use are supplied with each.
- A low cost, convenient product which meets EPA requirements.

Corning® Reusable Plastic Wash Bottles, Low Density Polyethylene, with PP Screw Cap

These bottles are manufactured from low density polyethylene and are offered with a narrow or wide-mouth. The cap and dispensing tube are manufactured from PP to optimize backflow of the solution. The design allows minimal turbulence of the liquid in the bottle.

Corning® PET Media Bottles with Leak-proof Screw Cap Validated Against IATA Standards

Polyethylene terephthalate (PET) bottles are ideal for storage and sampling of media, biologicals, and other aqueous solutions. The PET resin makes the bottle lightweight, break-resistant and as transparent as glass.

Features:

- Packaged in two convenient, shrink-wrapped trays within an outer bag to assure cleanliness
- Break-resistant bottles are an ergonomic and easy to handle alternative to glass
- Bottles are sterilized to 10⁻⁶ SAL and nonpyrogenic
- Leakproof screw cap is validated against IATA standards for air shipments
- Molded graduations for accurate measurements
- USP Class VI compliant bottles are validated noncytotoxic and nonhemolytic

Corning® Reusable Gas and Media Handling Fitting with Dual Inlets for Angled Sidearm Flasks

- Dual angled sidearm fittings can be used for aseptically transferring medium into or out of angled sidearm spinner flasks or for sparging the medium with gases.
- Fittings are comprised of a PET insert with a fluorocarbon O-Ring and a polypropylene sealing cap.
- Two 316 stainless steel tubes, which extend to the bottom of the flask, are held in place by modified polyphenylene oxide thermoplastic nuts with integrated ferrules.
- The fittings are completely autoclavable.

Spare parts for sidearm fittings, see Cat. Nos. 1395-32LTC, 1395-45LTC, 1395-LTR, and 1395LTMC

Falcon® Cell Culture Flasks

- Vacuum-gas plasma tissue culture treatment provides consistent cell attachment, spreading, and growth
- Choose standard tissue culture, Corning® Primaria™, or not tissue culture-treated polystyrene growth surfaces to meet your individual cell culture requirements
- Secure stacking provides stability from accidental tips or spills, and protection against contamination (canted neck flasks)
- Sterilized by gamma irradiation
- Nonpyrogenic tested to less than 0.1 EU/mL
- Volumetric graduations and writing patch
- Vented caps incorporate a 0.2 µm hydrophobic membrane for optimal gas exchange while protecting against contamination
- Growth area and volume are nominal

Corning® Reusable Glass Spinner Flask with Vertical Sidearms

- Can be used with direct drive motor or magnetically driven paddle assembly
- Side baffles enhance aeration and agitation of flask contents
- Proprietary “stretch” impeller design ensures optimal stirring
- 4, 45mm vertical sidearms permit use with sidearm probes and fittings
- Vessels are borosilicate glass. Other parts are made of materials that can be cleaned and sterilized to minimize the risk of cytotoxicity.
- Consistent height to width ratios for greater predictability in scale up across the full range of vessel sizes

Corning® Reusable Gas and Media Handling Fitting with Dual Inlets (1 long, 1 short tube) for Angled Sidearm Flasks

- Used to aseptically transfer medium, sparge the cell culture medium directly or add gases to the head space above the cell culture medium
- Fittings are comprised of a PET insert with a fluorocarbon O-Ring and a polypropylene sealing cap.
- One or two 316 stainless steel tubes extend to the bottom of the flask; the other is a shorter 6 length.
- Both tubes are held in place by modified polyphenylene oxide thermoplastic nuts with integrated ferrules.
- The fittings are completely autoclavable

PYREX® VISTA™ Single Metric Volumetric and Graduated Cylinders, Plastic Hexagonal Base, Blue Graduations, To Contain

These cylinders are calibrated “to contain”. They are supplied in two parts a strong, accurate glass graduate and a detachable, sturdy plastic base which absorbs impacts and reduces breakage. Tolerances are $\pm 5\%$ of total at any point. By removing the base, the graduate can be conveniently stacked. Bumper guards are supplied with 25 mL through 100 mL inclusive. The 10 mL has a funnel top for careful pouring.

Falcon® Aspirating Pipets

- Sterile, polystyrene, non-plugged, non-graduated pipets
- Safer alternative to glass Pasteur pipets
- Can be used for all vacuum-aspirating procedures
- Noncytotoxic, nonpyrogenic tested to less than 0.1 EU/mL
- Individually packaged in thermoformed paper-plastic wrap to ensure sterile presentation

Stripette™ Serological Pipets

- Sterile
- RNase-/DNase-free
- Human DNA-free
- Nonpyrogenic
- Noncytotoxic
- BSE/TSE-free
- Exclusive anti-drip tip assures accurate delivery
- Color-coded magnifier stripes make volume reading and size selection easier
- Bidirectional graduations provide choice of ascending and descending scales
- Negative graduations allow additional working volume
- Three packaging options: Individually wrapped, paper/plastic; Individually wrapped, clear plastic; bulk packed
- Volumetric accuracy of $\pm 2\%$ at full capacity

PYREX® Disposable Glass Serological Pipets, Individually Wrapped, Sterile, Plugged, To Deliver

These pipets, calibrated “To Deliver” with blow-out, offer long, slender, tapered tips to make pipetting go faster and easier. All pipets have negative graduations and fire-polished tips for burr-free, even flow rates. Easy-open Steri-View™ wrappers (one side paper, one side plastic) have color-coded sizes printed directly on the paper for easy identification by size. Colors conform to ISO standards. Reference: ASTM E-714.

Do not pipet by mouth. We suggest using a mechanical pipetting device.

PYREX® Disposable Glass Serological Pipets, Multi-Pack, Sterile, Plugged, To Deliver

Designed for the larger-volume user, these pipets are calibrated “To Deliver” with blow-out, and are packed to permit easy access to several pipets at a time without contaminating the entire case. Similar to Cat. No. 7077, except multi-packed in plastic bags. New ISO color-coding is printed directly on the tear strip for easy identification by size. Reference: ASTM E-714.

Do not pipet by mouth. We suggest using a mechanical pipetting device.

PYREX® Shorty Disposable Glass Serological Pipets, Multi-Pack, Sterile, Plugged, To Deliver

These shorty pipets, calibrated “To Deliver” with blow-out, are ideal for use in confined areas. The 5, 10, and 25 mL sizes have tooled tops. Negative graduations on each pipet make it applicable for both serological and measuring procedures. Packaged in plastic bags so several can be removed without contaminating the entire pack. ISO color-coding is printed directly on the tear strip.

Do not pipet by mouth. We suggest using a mechanical pipetting device.

Cat. No. 7078B-50 features negative and reverse graduations.

Corning® Disposable Glass Pasteur Pipets, Bulk Pack, Nonsterile, Unplugged

Corning disposable glass Pasteur pipets are available in convenient Packages. One-time use eliminates the danger of cross-contamination of valuable specimens or laboratory reagents. These pipets feature a constriction one inch below the top to facilitate plugging. They are ideal for rapid nonvolumetric transfer work in bacteriology, immunology, hematology, and serology studies, as well as blood bank and clinical chemistry procedures.

“B” series pipets are soda lime glass. “D” series are borosilicate glass.

Triple-bagged Packaging for Stripette™ Serological Pipets

Corning’s triple-bagged packaged pipets are a safety and convenience revolution. This extraordinary packaging is ideal for cell-based vaccine and drug production facilities, or other laboratory clean rooms.

- Triple-bagged
- Each pipet is individually wrapped in easy open paper/plastic
- No need for decontamination spraying with alcohol
- Sterility Assurance Level (SAL) of 10⁻⁶

Note: Triple-bagged packaged Stripettes have the same product claims and features as the standard Stripettes except for the sterility and packaging.

Falcon® Pipet Controller

The light, ergonomic, motorized pipet controller

Designed for use with glass and plastic serological pipets from 0.5 to 100 mL volume ranges.

Conveniently positioned switches change operating modes and speeds quickly to handle different liquid volumes and viscosities. Aspirating and dispensing speed is controlled through the finger triggers. When fully charged, the batteries enable up to 8 hours of continuous use. The large LCD display clearly indicates battery status, pipetting mode and speed.

The Falcon Pipet Controller is supplied with:

- Two-position charging stand
- Universal battery charger
- Three batteries
- Two 0.2 µm and two 0.45 µm hydrophobic
- Polytetrafluoroethylene (PTFE) filters

Additional filters are available as standard accessories. The filters, pipet holder and nosepiece are autoclavable.

Features

- Ergonomic design for exceptional comfort
- LCD display for continuous visualization of speed, modes and battery status
- Easy access to the battery compartment
- Easy maintenance

PYREX® 2.2 mL Disposable Bacteriological Pipets, Multi-Pack, Sterile, Plugged, Graduated

Product Number 7058-2X

These sterile disposable 2.2 mL PYREX® borosilicate glass pipets meet the requirements recommended by the American Public Health Association as shown in This pipet is very convenient when duplicate platings are to be made on the same medium or for plating differential medium for the determination of gram-negative bacteria, mold and yeast, or total plate count. They are designed for gravity feed (blow-out is not required). These cotton-plugged pipets are packaged in sterile bags. This allows the use of several pipets at a time without contamination of the entire case. New I.S.O. color-coding is printed directly on the tear strip for easy identification by size.

Corning® Vacuum Aspirator

Product Number 4930

The Corning® Aspirator is a device using vacuum to safely and aseptically dispose of supernatant from a variety of laboratory vessels. The aspirator includes a hand piece to which disposable pipet tips are attached during use, a grommet for accessory attachment and single-channel adapter for disposable pipet tips.

An 8-channel adapter is available for working in 96 well plates, see No. 4931. **Refer to the accessories tab below.**

Product Number	4930
Qty./Pk	1 / Pk
Qty./Cs	1 / Cs
Brand	Corning®
Compatibility	2 mL pipets , 1 - 200 µL disposable pipet tips

Axygen® Axypet® Single- and Multi-channel Pipettors

High levels of accuracy and precision with design innovations to make pipetting more comfortable during prolonged periods of time.

- Some are ISO 17025 Pre-calibrated
- Thumb-friendly soft spring pipetting system reduces fatigue
- Unique side EZIject button option reduces thumb movement (Left handed EZIject button available by special order).
- Finger-hook provides for a more relaxed grip
- Large ergonomic push button is easy on the thumb during contact
- Locking feature prevents accidental volume changes during pipetting procedures

Additional multi-channel pipettor features:

- Push button and ejector button are ergonomically located
- Curved ejector bar allows tips to be ejected in steps, reducing the mount of force required for ejection
- Tip manifold rotates 360°
- Each channel of the pipettor has an individual, precision piston assembly to ensure accuracy and reproducibility from one pipetting series to the next
- Shafts withdraw when pressed against a row of tips
- Each shaft moves independently, minimizing jamming of tips
- Micrometer is continuously adjustable for selection of whole or fractional volumes

Corning® Lambda™ EliteTouch™ Single- and Multi-channel Pipettors

Corning® Lambda™ EliteTouch™ pipettors have been engineered to provide the highest levels of ergonomics, accuracy, and precision. Lightweight construction, contoured shape of the handle, and 4-digit counter were designed to ensure comfortable pipetting. All pipettors feature smooth plunger movement and extremely low pipetting forces to reduce the wrist strain and fatigue (RSI). Colored pushbuttons (included) can help define user or application for sample safety and lower risk of cross contamination.

- Ergonomic handle design for perfect fit for both right and left hand
- Convenient one-hand volume setting with auto-lock system prevents accidental volume change during work
- 4-digit counter for greater precision, perfectly positioned for visibility at all times
- Single-channel pipettors are compatible with very narrow tubes
- Fully autoclavable and UV-resistant for sample protection against contaminations
- The multi-channel shafts retract individually for perfect tip loading and easier tip ejection
- Easy in-lab calibration helps you quickly adjust your pipettor to various liquid types
- Individually tested and supplied with a certificate of quality

Corning® Lambda™ Plus Single- and Multi-channel Pipettors

Engineered to provide the highest levels of accuracy, reproducibility, and comfort

Available in single-, eight-and twelve-channel configurations, all Lambda Plus pipettors feature smooth plunger movement and extremely low pipetting forces. Volume can be set by turning either the thumb wheel or the plunger button, and a locking mechanism prevents accidental change. The Lambda Plus pipettors have been designed to maintain their calibration, even after repeated use and autoclaving. A key is included with each pipettor for easy in-house calibration.

Features

- Factory calibrated to strict ISO 8655 standards-3-year warranty
- Fully autoclavable and UV resistant
- Designed for universal fit with all common brands of pipet tips
- Adjustable tip ejector

Corning® DeckWorks Hinged Rack Standard Pipet Tips

Corning universal fit tips in hinged DeckWorks racks are available in 10 µL, 200 µL, 300 µL, and 1,000 µL sizes. The 10 µL, 300 µL, and 1,000 µL tips are extended length and allow for improved access into microcentrifuge (1.5 mL) and standard conical bottom (15/50 mL) centrifuge tubes. Robust 96-tip racks are designed for repeated steam autoclave cycles and can be reused by removing the empty grey tip deck and replacing it with a new reload deck of 96 tips from the DeckWorks reload system. Corning racked 300 µL DeckWorks pipet tips are designed for all popular 300 µL multi-channel instruments.

Corning® DeckWorks Hinged Rack Barrier Pipet Tips

Corning DeckWorks barrier tips feature an inert, high-density polyethylene barrier to eliminate aerosol carryover contamination during critical pipetting procedures. DeckWorks low binding barrier tips will not trap liquids or inhibit PCR in the event of over pipetting.

The larger volume extended length barrier 1000 uL tip is not available in low binding.

Corning® Universal Fit 200 µL and 1000 µL Pipet Tips

- Corning universal fit tips are designed to provide a reliable fit with most major brand pipettors. (A Pipet Tip Compatibility Guide can be requested or downloaded from the Corning website).
- Beveled orifice helps ensure accurate fluid delivery.
- 1-200 µL universal fit tips are graduated at the 250 µL, 500 µL, and 1,000 µL volumes.
- Select from three packaging options: Stack rack tips feature a stack of five racks, each containing 96 tips, for a total of 480 tips in a space-saving design. Bulk packed tips are nonsterile and economical.
- RNase-/DNase-free.
- Nonpyrogenic.

Axygen® MultiRack Pipet Tip System

The Axxygen MultiRack tip system has been engineered to fit most of the pipettors in the market. It is an interchangeable complete system offered in bulk, racked, filter, and reload packaging styles to meet the variety of needs in the lab setting. The MultiRack tip system offers standard and extended length tips covering volumes from 1 µL to 1250 µL. For racked and reload packaging styles, the tips are pre-loaded into easy-load color-coded deck inserts. With the smaller footprint and reusable rack, this system uses 30% less plastic, minimizing the environmental impact. The stackable design saves critical bench space. Axxygen MultiRack Tip System products are made in the USA and meet ISO standards. All tips are free of detectable RNase, DNase, DNA, and pyrogens.

Features

- Reusable rack with reload systems
- Smaller footprint and stackable design, saving valuable bench space
- Extended tips offered in 10, 300, and 1250 µL (1000 µL extended length) volumes
- Color-coded racks for easy volume identification

Corning® DeckWorks Reload Systems

Corning DeckWorks reload systems are available in 10 µL, 200 µL, 300 µL, and 1,000 µL sizes and allow for convenient and economical reloading of durable Corning DeckWorks hinged racks. DeckWorks reload decks are packaged in transparent trays for easy tip identification, requires no transfer devices, saves space, and minimizes packaging waste. Although the pipet tips are made from virgin medical-grade resins, the reload decks and rack bases are manufactured from 100% recycled polypropylene. Nonsterile decks and racks are steam autoclavable.

Corning DeckWorks low binding tips are available in 10 µL, 200 µL, and 300 µL sizes. Proprietary low binding technology reduces surface tension on the interior wall of the tip. Leaching and/or subsequent sample degradation associated with silicone-based tips is eliminated. DeckWorks low binding tips are ideal for quantitative assays in which sample binding can significantly alter results. Specific applications include accurate and precise pipetting of expensive reagents, DNA, proteins, and/or peptides.

Corning® IsoTip Filtered Pipet Tips

- IsoTip filtered pipet tips feature an inert, hydrophobic barrier that prevents aerosolized contaminants from coming in contact with pipettor shafts. (A Pipet Tip Compatibility Guide can be requested or downloaded from the Corning website.)
- Ideal for applications where avoiding cross contamination is critical, such as DNA amplification and radioisotope handling.
- Packaged sterile.
- RNase-/DNase-free.
- Nonpyrogenic.

Corning® DeckWorks Tip Station

Corning DeckWorks tip station maximizes bench space while minimizing plastic waste. Tip stations contain 960 tips, are available in extended-length 10 µL and traditional 200 µL sizes, and are the ideal single and multi-channel pipetting stations. The 5-layer deck design (2 x 96) matches the microtiter plate format. This stable pipetting platform fits easily into sterile hood environments. Lids can be snap-positioned to expose a single side (96 tips) only. Applications include pre- and post-PCR procedures, cell culture, and assays requiring large tip quantities. Corning DeckWorks tip stations are offered both sterile and nonsterile.

Corning® DeckWorks Hinged Rack Low Binding Pipet Tips

Corning DeckWorks low binding tips are available in 10 µL, 200 µL, and 300 µL sizes. Proprietary low binding technology reduces surface tension on the interior wall of the tip. Leaching and/or subsequent sample degradation associated with silicone-based tips are eliminated. DeckWorks low binding tips are ideal for quantitative assays in which sample binding can significantly alter results. Specific applications include accurate and precise pipetting of expensive reagents, DNA, proteins and/or peptides.

Qty./Pk	3840 / Pk
Qty./Cs	19200 / Cs

Product Number	FXF-384-30FP-R-S
Product Name	Axygen® 384-well tips, 25µL, Clear, Filtered, Sterile, Fine Point, SLAS Rack
Qty./Pk	3840 / Pk
Qty./Cs	19200 / Cs

Axygen® Automation Tips for PerkinElmer | MultiPROBE, Janus®

- Tip format: 96 tip
- Tip volume range: 20 µL to 1,000 µL
- Tip material: Clear polypropylene
- RNase-/DNase-/human gDNA-free
- Nonpyrogenic
- Available options:
 - With or without aerosol-resistant filters
 - Nonsterile or sterile
- Compatible heads: Variospan 1, 4, 8, P235
- Rack format: ANSI/SLAS
- Rack material: Polypropylene
- 1 mL rack format: Non-ANSI hanging tip rack
- Rack material: Polycarbonate

Material

Clear Polypropylene
Conductive Black Polypropylene

Pack Type

10 Racks/Pk, 5 Pk/Cs

Capacity

20 µL
25 µL
50 µL
175 µL
235 µL

Tip Type

Filtered, Sterile
Non-filtered
Non-filtered, Sterile

PYREX® Beakers, Low Form, Double Scale, Graduated

Beaker, with spout, manufactured with uniform wall thickness, offers optimum balance between thermal shock resistance and mechanical strength. For convenience, the 250 through 4000 mL beakers have a double graduated metric scale to indicate approximate content. All sizes have an extra large marking spot. The 10 mL size is not graduated.

Costar® Snap Cap Polypropylene Microcentrifuge Tubes

- Supplied nonsterile and are autoclavable.
- External graduations and frosted writing spot for easy sample identification.
- Positive seal design allows repeated opening and closing.
- Flat cap surface for convenient labeling.
- Withstands a maximum RCF of 17,000 x g.
- Costar low binding microcentrifuge tubes feature a bonded polymer technology that reduces protein and nucleic acid binding, resulting in better sample recovery.
- RNase-/DNase-free.

Falcon® Conical Centrifuge Tubes

- Meet bioanalytical-grade requirements and provide unsurpassed performance in critical research applications
- Exceptionally strong— Industry leading centrifugation rating of 16,000 RCF (50 mL polypropylene)
- Unique double threaded cap design reducing cross threading and leakage
- Easy-to-read graduations
- Consistent biological and physical properties
- Ideal for long-term cryogenic storage of specimens at -80°C (15 to 225 mL polypropylene tubes)

The most dependable tube in the lab

Falcon conical tubes are easy-to-use, high quality tools to protect your precious samples. State-of-the-art design and manufacturing create tubes engineered to provide high strength, wide temperature stability, and to perform in your critical applications. They will protect your valuable samples during centrifugation, vortexing, and long term storage in the freezer. To meet this intense challenge, Falcon tubes are designed for:

- High strength: State-of-the-art mold design, coupled with advanced resin selection, create tube walls that are engineered to perform under high-stress situations.
- Nonpyrogenicity: Tested to less than 0.1 EU/mL.
- Nontoxicity: Resins are selected via an intense array of U.S. Pharmacopoeia (USP) toxicity tests.
- Low protein binding: Corning engineers and scientists are continually searching for materials and processes that minimize labware-induced interference, such as protein binding.
- Quality packaging: Falcon tubes, in addition to offering bioanalytical-grade performance, use medical-style packaging to better assure sterile presentation. The conical tubes are packaged in convenient reusable racks or compact environmentally-friendly bulk packs.
- Support cushions (Catalog No. 352090 for both 175mL and 225mL) must be used with this product unless the centrifuge rotor already has appropriate V-bottom cushions.

Axygen® MaxyClear SnapLock Microcentrifuge Tubes

Axygen MaxyClear microcentrifuge tubes are available in a variety of colors. Axxygen Maxymum Recovery® surface and sterile options are also available. SnapLock microcentrifuge tubes have frosted cap surfaces and frosted side panels, ideal for labeling. Each cap features a piercing port in the center of the cap. Microcentrifuge tubes with no caps are available for some sizes.

- 0.6 mL, 1.5 mL, and 2.0 mL clear microcentrifuge tubes are boil proof. Colored tubes are not boil-proof.
- Co-polymer tubes offer exceptional strength and chemical resistance. Not to be autoclavable or boil-proof.
- Clear microcentrifuge tubes are boil-proof. Colored tubes are not boil-proof.
- Maximum G-force is 14,000 RCF.
- RNase-/DNase-free and nonpyrogenic
- Sterility Assurance Level (SAL) of 10⁻⁶
- Color - Assorted: Each pack contains a mixture of blue, green, violet, orange, red, and yellow.
- Clear microcentrifuge tubes are boil-proof. Colored tubes are not boil-proof.
- Color - Spectrum: 2 packs each of blue, green, orange, red, and yellow.

Axygen® Screw Cap Tubes

Axygen microcentrifuge tubes feature a screw cap that provides a tight secure seal. Screw cap tubes are available in a variety of colors with a conical or self-standing bottom. Sterile options are also available.

- Maximum G-force is 20,000 RCF.
- RNase-/DNase-free
- Nonpyrogenic

Tubes, with Cap, Sterile

All sterile screw cap microcentrifuge tubes are pre-assembled with non-looped caps with O-Rings.

Colored-cap versions are also available in sterile format.

Spin-X® Centrifuge Tube Filters

- Spin-X centrifuge tube filters consist of a membrane-containing filter unit within a microcentrifuge tube.
- Uses: Removing bacteria, cells, and particles from liquids; HPLC sample preparation; DNA removal from agarose or acrylamide gels. Maximum RCF is 16,000 x g.

Corning® 15 mL and 50 mL Universal Rack for Conical Bottom Centrifuge Tubes

Product Number 4366

These polystyrene foam racks are designed to hold Corning 15mL and 50 mL conical bottom plastic centrifuge tubes in the same rack.

Details

Product Number	4366
Qty./Pk	20 / Pk
Qty./Cs	20 / Cs
Brand	Corning®
Capacity	25 Tubes
Tube Style	Centrifuge
Color	Green
Sterile	No
Rack	Yes

Falcon® Round Bottom High-clarity Polypropylene Tube

- Widely used and referenced in laboratory protocols
- Dual position snap-cap prevents sample loss with ease of handling
- Sterile, nonpyrogenicity tested to less than 0.1 EU/mL (Cat. No. 352002 nonsterile)

The foundation for consistent research results

- Provide reliable containment of laboratory fluid samples
- Polypropylene tubes are best suited for applications requiring greater thermal and chemical stability
- Dual-position snap caps, heavier gauge walls, and unique construction provide a secure, positive seal
- Medical-style packaging materials
- 3,000 RCF rating (RCF claims refer to Relative Centrifugal Force measured in g-force for materials with a specific gravity of 1.0, used in an appropriate rotor with correct cushion and safety precautions. Tubes used with organic solvents at temperatures below 0°C may have lower RCF ratings.)
- 17 x 100 mm tubes have blue printed graduations and white writing patch
- Tube dimensions and volumes are approximate

Falcon® Round Bottom Polystyrene Tubes

- Widely used and referenced in laboratory protocols
- Dual position snap-cap prevents sample loss with ease of handling
- Sterile, nonpyrogenicity tested to less than 0.1 EU/mL (Cat. No. 352008 nonsterile)

The foundation for consistent research results

- Provide reliable containment of laboratory fluid samples
- Polystyrene tubes are best suited for procedures requiring high optical clarity
- Dual-position snap caps, heavier gauge walls, and unique construction provide a secure, positive seal
- Medical-style packaging materials
- 1,400 RCF rating (RCF claims refer to Relative Centrifugal Force measured in g-force for materials with a specific gravity of 1.0, used in an appropriate rotor with correct cushion and safety precautions. Tubes used with organic solvents at temperatures below 0°C may have lower RCF ratings.)

Corning® Centrifuge Bottles

Two easy grip cap styles: standard and high performance with silicone O-Ring

Note: Caps are not interchangeable among different materials or sizes.

- Wide-mouth design improves liquid handling.
- Compatible with most centrifuges and do not require special buckets
- Extra-thick walls for durability
- Leak-free processing at maximum rated speeds
- Polypropylene bottles are autoclavable at 121°C, 15 psi for 20 minutes.

Cap Style

PYREX® Disposable Glass Conical Centrifuge Tubes, Ungraduated, without Screw Cap

These tubes feature more consistent uniform wall thickness, a well formed conical tapered tip, and durable tip radius. The tubes are designed to withstand centrifugation up to 3000 RCF.

Screw caps are sold separately. Product is supplied nonsterile.

For screw caps, see Cat. Nos. 9998-13, 99999-13 to fit Cat. No. 99502-5; see Cat. No. 9998-15, 99999-15 to fit Cat. Nos. 99502-10, 99502-15; see Cat. Nos. 9999-24 to fit Cat. No. 99502-50.

Corning Self-standing 50 mL Centrifuge Tubes

- Corning® 50 mL centrifuge tubes feature black printed graduations and a large white marking spot.
- Available with your choice of cap styles: the advanced Corning CentriStar™ cap or the original plug seal cap.
- 95 kPA (14 psi) pressure tested – plug seal cap only.
- Tubes are bulk packed in resealable sleeves.
- Sterile.
- RNase-/DNase-free.
- Nonpyrogenic.

Corning® 250 mL PP Centrifuge Tubes with Plug Seal Cap, Sterile, 6/Pack, 102/Case

Product Number 430776

Corning® 250 mL polypropylene (PP) centrifuge tubes are ideal for applications requiring large volume centrifugation. Please check our Technical Information Listing for information on the physical and chemical properties of Corning plastic centrifuge tubes as well as important suggestions for safe use.

- Support cushions (Catalog No. 430236 for 250) must be used with this product unless the centrifuge rotor has appropriate V-bottom cushions.
- Polyethylene plug seal caps.
- Maximum RCF of 6,000xg
- Tubes are sterile and nonpyrogenic.
