Falcon® Cushions (for 175 mL and 225 mL Conical Centrifuge Tubes with Extractor)

Product Number 352090

Cushions and extractor for use with 175 mL and 225 mL conical centrifuge tubes (Cat. Nos. 352075 and 352076). Nonsterile. 8/case.

Material

- Cushions: Polypropylene
- Wire Extractor: Stainless steel

Details

Product Number	352090
Qty./Pk	8 / Pk
Qty./Cs	8 / Cs
Brand	Falcon®

Costar® Snap Cap Polypropylene Microcentrifuge Tubes

- Supplied nonsterile and are autoclavable.
- External graduations and frosted writing spot for easy sample identification.
- Positive seal design allows repeated opening and closing.
- Flat cap surface for convenient labeling.
- Withstands a maximum RCF of 17,000 x g.
- Costar low binding microcentrifuge tubes feature a bonded polymer technology that reduces protein and nucleic acid binding, resulting in better sample recovery.
- RNase-/DNase-free.

Falcon® Conical Centrifuge Tubes

- Meet bioanalytical-grade requirements and provide unsurpassed performance in critical research applications
- Exceptionally strong— Industry leading centrifugation rating of 16,000 RCF (50 mL polypropylene)
- Unique double threaded cap design reducing cross threading and leakage
- Easy-to-read graduations
- Consistent biological and physical properties
- Ideal for long-term cryogenic storage of specimens at -80°C (15 to 225 mL polypropylene tubes)

The most dependable tube in the lab

Falcon conical tubes are easy-to-use, high quality tools to protect your precious samples. State-of-the-art design and manufacturing create tubes engineered to provide high strength, wide temperature stability, and to perform in your critical applications. They will protect your valuable samples during centrifugation, vortexing, and long term storage in the freezer. To meet this intense challenge, Falcon tubes are designed for:

- High strength: State-of-the-art mold design, coupled with advanced resin selection, create tube walls that are engineered to perform under high-stress situations.
- Nonpyrogenicity: Tested to less than 0.1 EU/mL.
- Nontoxicity: Resins are selected via an intense array of U.S. Pharmacopoeia (USP) toxicity tests.
- Low protein binding: Corning engineers and scientists are continually searching for materials and processes that minimize labware-induced interference, such as protein binding.
- Quality packaging: Falcon tubes, in addition to offering bioanalytical-grade performance, use medical-style packaging to better assure sterile presentation. The conical tubes are packaged in convenient reusable racks or compact environmentally-friendly bulk packs.
- Support cushions (Catalog No. 352090 for both 175mL and 225mL) must be used with this product unless the centrifuge rotor already has appropriate V-bottom cushions.

Axygen® MaxyClear SnapLock Microcentrifuge Tubes

Axygen MaxyClear microcentrifuge tubes are available in a variety of colors. Axxygen Maxymum Recovery® surface and sterile options are also available. SnapLock microcentrifuge tubes have frosted cap surfaces and frosted side panels, ideal for labeling. Each cap features a piercing port in the center of the cap. Microcentrifuge tubes with no caps are available for some sizes.

- 0.6 mL, 1.5 mL, and 2.0 mL clear microcentrifuge tubes are boil proof. Colored tubes are not boil-proof.
- Co-polymer tubes offer exceptional strength and chemical resistance. Not to be autoclavable or boil-proof.
- Clear microcentrifuge tubes are boil-proof. Colored tubes are not boil-proof.
- Maximum G-force is 14,000 RCF.
- RNase-/DNase-free and nonpyrogenic
- Sterility Assurance Level (SAL) of 10⁻⁶
- Color - Assorted: Each pack contains a mixture of blue, green, violet, orange, red, and yellow.
- Clear microcentrifuge tubes are boil-proof. Colored tubes are not boil-proof.
- Color - Spectrum: 2 packs each of blue, green, orange, red, and yellow.

Axygen® Screw Cap Tubes

Axygen microcentrifuge tubes feature a screw cap that provides a tight secure seal. Screw cap tubes are available in a variety of colors with a conical or self-standing bottom. Sterile options are also available.

- Maximum G-force is 20,000 RCF.
- RNase-/DNase-free
- Nonpyrogenic

Tubes, with Cap, Sterile

All sterile screw cap microcentrifuge tubes are pre-assembled with non-looped caps with O-Rings.

Colored-cap versions are also available in sterile format.

Corning® Vacuum Aspirator

Product Number 4930

The Corning® Aspirator is a device using vacuum to safely and aseptically dispose of supernatant from a variety of laboratory vessels. The aspirator includes a hand piece to which disposable pipet tips are attached during use, a grommet for accessory attachment and single-channel adapter for disposable pipet tips.

An 8-channel adapter is available for working in 96 well plates, see No. 4931. **Refer to the accessories tab below.**

Corning® 15mL Centrifuge Tubes

- Corning 15 mL centrifuge tubes feature black printed graduations and a large white marking spot.
- Available with your choice of cap styles: the advanced Corning CentriStar™ cap or the original plug seal cap.
- Sterile. RNase-/DNase-free.
- Nonpyrogenic.
- 95 kPA (14 psi) pressure tested – plug seal cap only.

PP = polypropylene, PET = polyethylene terephthalate, RCF = relative centrifugal force (x g).

Corning® Stripettor Ultra Charging Stand

Product Number 4998

Corning Stripettor Ultra Charging Stand is intended to conveniently charge and store the pipet controller when not in use. The three possible positions for either storing or charging are visible as icons printed on the stand.

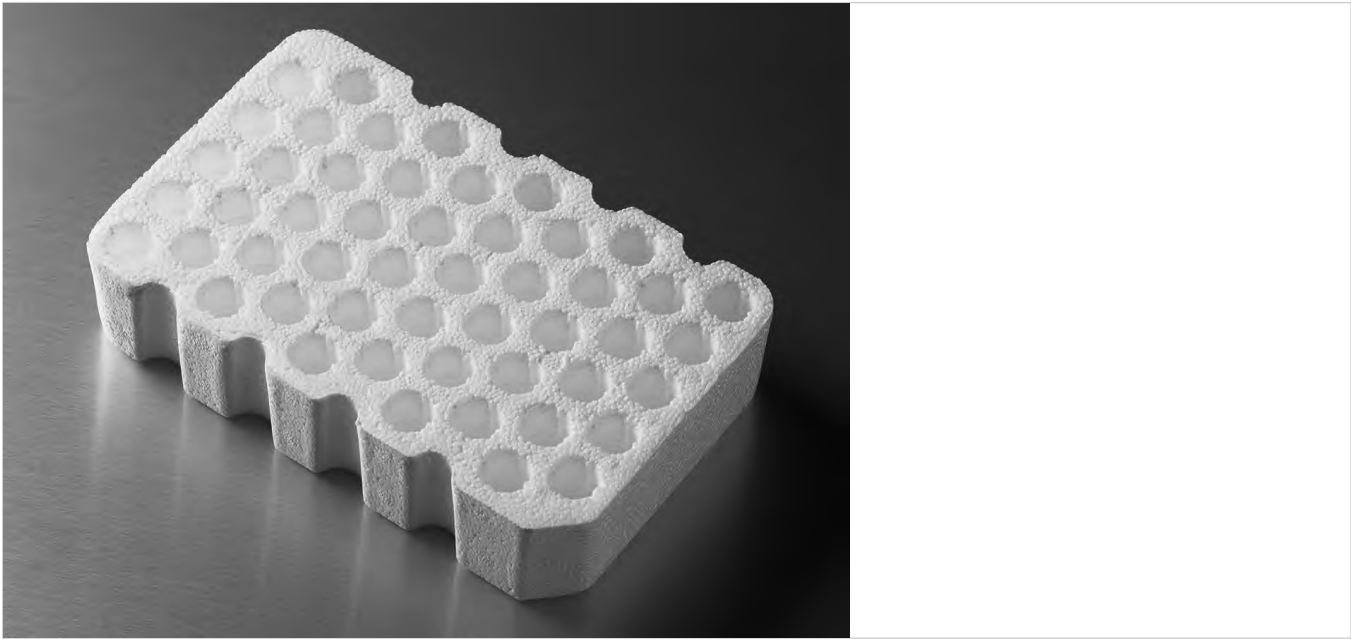

- Break position: Convenient while working, helps to avoid contamination.
- Rest position: Ideal way to store a pipet controller after use.
- Charging position: Used while pipet controller is in charging process.

Corning® Empty Racks With Lids for 96 Screw Capped or Thermoplastic Elastomers (TPE) Capped Storage Tubes, 5 Racks/Pack, 2 Packs/Case, 10 Racks/Case

Product Number 8508

- These polypropylene racks are designed to hold 25 Corning 96 1.3 mL storage tubes.
- For use with Cat. Nos. 6500 and 8502.

Falcon® Aspirating Pipets

- Sterile, polystyrene, non-plugged, non-graduated pipets
- Safer alternative to glass Pasteur pipets
- Can be used for all vacuum-aspirating procedures
- Noncytotoxic, nonpyrogenic tested to less than 0.1 EU/mL
- Individually packaged in thermoformed paper-plastic wrap to ensure sterile presentation

Capacity

	2 mL
	5 mL

Products

Product Number	357501

Stripette™ Serological Pipets

- Sterile
- RNase-/DNase-free
- Human DNA-free
- Nonpyrogenic
- Noncytotoxic
- BSE/TSE-free
- Exclusive anti-drip tip assures accurate delivery
- Color-coded magnifier stripes make volume reading and size selection easier
- Bidirectional graduations provide choice of ascending and descending scales
- Negative graduations allow additional working volume
- Three packaging options: Individually wrapped, paper/plastic; Individually wrapped, clear plastic; bulk packed
- Volumetric accuracy of $\pm 2\%$ at full capacity

Corning® Gosselin™ Water Sampling Bottles

- Break-resistant polyethylene terephthalate (PET) or High-density Polyethylene (HDPE)
- Molded graduations
- Leak-proof tamper-evident HDPE screw caps are available for the 500 mL and 1L bottle not the 250 mL.
- Available with or without sodium thiosulfate
- Traceable labels
- Large openings minimize risk of contamination
- Film-packed or individually bagged

Corning® DeckWorks Hinged Rack Standard Pipet Tips

Corning universal fit tips in hinged DeckWorks racks are available in 10 µL, 200 µL, 300 µL, and 1,000 µL sizes. The 10 µL, 300 µL, and 1,000 µL tips are extended length and allow for improved access into microcentrifuge (1.5 mL) and standard conical bottom (15/50 mL) centrifuge tubes. Robust 96-tip racks are designed for repeated steam autoclave cycles and can be reused by removing the empty grey tip deck and replacing it with a new reload deck of 96 tips from the DeckWorks reload system. Corning racked 300 µL DeckWorks pipet tips are designed for all popular 300 µL multi-channel instruments.

Corning® DeckWorks Hinged Rack Barrier Pipet Tips

Corning DeckWorks barrier tips feature an inert, high-density polyethylene barrier to eliminate aerosol carryover contamination during critical pipetting procedures. DeckWorks low binding barrier tips will not trap liquids or inhibit PCR in the event of over pipetting.

The larger volume extended length barrier 1000 uL tip is not available in low binding.

PYREX® Disposable Glass Serological Pipets, Multi-Pack, Sterile, Plugged, To Deliver

Designed for the larger-volume user, these pipets are calibrated “To Deliver” with blow-out, and are packed to permit easy access to several pipets at a time without contaminating the entire case. Similar to Cat. No. 7077, except multi-packed in plastic bags. New ISO color-coding is printed directly on the tear strip for easy identification by size. Reference: ASTM E-714.

Do not pipet by mouth. We suggest using a mechanical pipetting device.

Falcon® Round Bottom Polystyrene Tubes

- Widely used and referenced in laboratory protocols
- Dual position snap-cap prevents sample loss with ease of handling
- Sterile, nonpyrogenicity tested to less than 0.1 EU/mL (Cat. No. 352008 nonsterile)

The foundation for consistent research results

- Provide reliable containment of laboratory fluid samples
- Polystyrene tubes are best suited for procedures requiring high optical clarity
- Dual-position snap caps, heavier gauge walls, and unique construction provide a secure, positive seal
- Medical-style packaging materials
- 1,400 RCF rating (RCF claims refer to Relative Centrifugal Force measured in g-force for materials with a specific gravity of 1.0, used in an appropriate rotor with correct cushion and safety precautions. Tubes used with organic solvents at temperatures below 0°C may have lower RCF ratings.)
- Tube dimensions and volumes are approximate

Corning® Universal Fit 200 µL and 1000 µL Pipet Tips

- Corning universal fit tips are designed to provide a reliable fit with most major brand pipettors. (A Pipet Tip Compatibility Guide can be requested or downloaded from the Corning website).
- Beveled orifice helps ensure accurate fluid delivery.
- 1-200 µL universal fit tips are graduated at the 250 µL, 500 µL, and 1,000 µL volumes.
- Select from three packaging options: Stack rack tips feature a stack of five racks, each containing 96 tips, for a total of 480 tips in a space-saving design. Bulk packed tips are nonsterile and economical.
- RNase-/DNase-free.
- Nonpyrogenic.

Axygen® Axypet® Single- and Multi-channel Pipettors

High levels of accuracy and precision with design innovations to make pipetting more comfortable during prolonged periods of time.

- Some are ISO 17025 Pre-calibrated
- Thumb-friendly soft spring pipetting system reduces fatigue
- Unique side EZject button option reduces thumb movement (Left handed EZject button available by special order).
- Finger-hook provides for a more relaxed grip
- Large ergonomic push button is easy on the thumb during contact
- Locking feature prevents accidental volume changes during pipetting procedures

Additional multi-channel pipettor features:

- Push button and ejector button are ergonomically located
- Curved ejector bar allows tips to be ejected in steps, reducing the mount of force required for ejection
- Tip manifold rotates 360°
- Each channel of the pipettor has an individual, precision piston assembly to ensure accuracy and reproducibility from one pipetting series to the next
- Shafts withdraw when pressed against a row of tips
- Each shaft moves independently, minimizing jamming of tips
- Micrometer is continuously adjustable for selection of whole or fractional volumes

Corning® Lambda™ EliteTouch™ Single- and Multi-channel Pipettors

Corning® Lambda™ EliteTouch™ pipettors have been engineered to provide the highest levels of ergonomics, accuracy, and precision. Lightweight construction, contoured shape of the handle, and 4-digit counter were designed to ensure comfortable pipetting. All pipettors feature smooth plunger movement and extremely low pipetting forces to reduce the wrist strain and fatigue (RSI). Colored pushbuttons (included) can help define user or application for sample safety and lower risk of cross contamination.

- Ergonomic handle design for perfect fit for both right and left hand
- Convenient one-hand volume setting with auto-lock system prevents accidental volume change during work
- 4-digit counter for greater precision, perfectly positioned for visibility at all times
- Single-channel pipettors are compatible with very narrow tubes
- Fully autoclavable and UV-resistant for sample protection against contaminations
- The multi-channel shafts retract individually for perfect tip loading and easier tip ejection
- Easy in-lab calibration helps you quickly adjust your pipettor to various liquid types
- Individually tested and supplied with a certificate of quality

Axygen® MultiRack Pipet Tip System

The Axxygen MultiRack tip system has been engineered to fit most of the pipettors in the market. It is an interchangeable complete system offered in bulk, racked, filter, and reload packaging styles to meet the variety of needs in the lab setting. The MultiRack tip system offers standard and extended length tips covering volumes from 1 µL to 1250 µL. For racked and reload packaging styles, the tips are pre-loaded into easy-load color-coded deck inserts. With the smaller footprint and reusable rack, this system uses 30% less plastic, minimizing the environmental impact. The stackable design saves critical bench space. Axxygen MultiRack Tip System products are made in the USA and meet ISO standards. All tips are free of detectable RNase, DNase, DNA, and pyrogens.

Features

- Reusable rack with reload systems
- Smaller footprint and stackable design, saving valuable bench space
- Extended tips offered in 10, 300, and 1250 µL (1000 µL extended length) volumes
- Color-coded racks for easy volume identification

Corning® 50 mL Centrifuge Tubes

- Corning 50 mL centrifuge tubes feature black printed graduations and a large white marking spot.
- Available with your choice of cap styles: the advanced CentriStar cap or the original plug seal cap.
- 95 kPA (14 psi) pressure tested – plug seal cap only.
- Simplify your workflow with: Color bands visually identify samples; Hazardous materials pictograms that comply with OSHA and GHS standards. Sterile.
- RNase-/DNase-free.
- Nonpyrogenic.

PP = polypropylene, PET = polyethylene terephthalate, RCF = relative centrifugal force (x g).

Corning® Lambda™ Plus Single- and Multi-channel Pipettors

Engineered to provide the highest levels of accuracy, reproducibility, and comfort

Available in single-, eight-and twelve-channel configurations, all Lambda Plus pipettors feature smooth plunger movement and extremely low pipetting forces. Volume can be set by turning either the thumb wheel or the plunger button, and a locking mechanism prevents accidental change. The Lambda Plus pipettors have been designed to maintain their calibration, even after repeated use and autoclaving. A key is included with each pipettor for easy in-house calibration.

Features

- Factory calibrated to strict ISO 8655 standards-3-year warranty
- Fully autoclavable and UV resistant
- Designed for universal fit with all common brands of pipet tips
- Adjustable tip ejector

Corning® Lambda™ EliteTouch™ Single- and Multi-channel Pipettors

Corning® Lambda™ EliteTouch™ pipettors have been engineered to provide the highest levels of ergonomics, accuracy, and precision. Lightweight construction, contoured shape of the handle, and 4-digit counter were designed to ensure comfortable pipetting. All pipettors feature smooth plunger movement and extremely low pipetting forces to reduce the wrist strain and fatigue (RSI). Colored pushbuttons (included) can help define user or application for sample safety and lower risk of cross contamination.

- Ergonomic handle design for perfect fit for both right and left hand
- Convenient one-hand volume setting with auto-lock system prevents accidental volume change during work
- 4-digit counter for greater precision, perfectly positioned for visibility at all times
- Single-channel pipettors are compatible with very narrow tubes
- Fully autoclavable and UV-resistant for sample protection against contaminations
- The multi-channel shafts retract individually for perfect tip loading and easier tip ejection
- Easy in-lab calibration helps you quickly adjust your pipettor to various liquid types
- Individually tested and supplied with a certificate of quality

Axygen® MultiRack Pipet Tip System

The Axxygen MultiRack tip system has been engineered to fit most of the pipettors in the market. It is an interchangeable complete system offered in bulk, racked, filter, and reload packaging styles to meet the variety of needs in the lab setting. The MultiRack tip system offers standard and extended length tips covering volumes from 1 µL to 1250 µL. For racked and reload packaging styles, the tips are pre-loaded into easy-load color-coded deck inserts. With the smaller footprint and reusable rack, this system uses 30% less plastic, minimizing the environmental impact. The stackable design saves critical bench space. Axxygen MultiRack Tip System products are made in the USA and meet ISO standards. All tips are free of detectable RNase, DNase, DNA, and pyrogens.

Features

- Reusable rack with reload systems
- Smaller footprint and stackable design, saving valuable bench space
- Extended tips offered in 10, 300, and 1250 µL (1000 µL extended length) volumes
- Color-coded racks for easy volume identification

Axygen® Microcentrifuge Screw Caps

Axygen microcentrifuge tubes feature a screw cap that provides a tight secure seal. Screw cap tubes are available in a variety of colors with a conical or self-standing bottom. Sterile options are also available.

- Maximum G-force is 20,000 RCF.
- RNase-/DNase-free
- Nonpyrogenic

Tubes, with Cap, Sterile

All sterile screw cap microcentrifuge tubes are pre-assembled with non-looped caps with O-Rings.

Colored-cap versions are also available in sterile format.

Corning® External Thread Cryogenic Vials

- Manufactured from polypropylene to withstand temperatures down to -196°C
- Black graduations with large marking spot
- Vials have a silicone washer for a secure seal.
- 2 mL self-standing vials are available in five cap colors
- Vials may be color coded with inserts.
- Self-standing vials have a special base design allowing them to be locked into cryogenic rack and tray (Cat. No. 431131) for single-handed manipulation.
- Free foam rack with each case
- RNase-/DNase-free
- Sterile
- Nonpyrogenic

Warning! Do not use cryogenic vials for storage in the liquid phase of liquid nitrogen. Only store vials in the vapor phase above the liquefied gas. Always use appropriate safety equipment when removing vials from cryogenic storage.

Spin-X® Centrifuge Tube Filters

- Spin-X centrifuge tube filters consist of a membrane-containing filter unit within a microcentrifuge tube.
- Uses: Removing bacteria, cells, and particles from liquids; HPLC sample preparation; DNA removal from agarose or acrylamide gels. Maximum RCF is 16,000 x g.

Corning® Universal Fit 200 µL and 1000 µL Pipet Tips

- Corning universal fit tips are designed to provide a reliable fit with most major brand pipettors. (A Pipet Tip Compatibility Guide can be requested or downloaded from the Corning website).
- Beveled orifice helps ensure accurate fluid delivery.
- 1-200 µL universal fit tips are graduated at the 250 µL, 500 µL, and 1,000 µL volumes.
- Select from three packaging options: Stack rack tips feature a stack of five racks, each containing 96 tips, for a total of 480 tips in a space-saving design. Bulk packed tips are nonsterile and economical.
- RNase-/DNase-free.
- Nonpyrogenic.

Corning® Lambda™ Plus Single- and Multi-channel Pipettors

Engineered to provide the highest levels of accuracy, reproducibility, and comfort

Available in single-, eight-and twelve-channel configurations, all Lambda Plus pipettors feature smooth plunger movement and extremely low pipetting forces. Volume can be set by turning either the thumb wheel or the plunger button, and a locking mechanism prevents accidental change. The Lambda Plus pipettors have been designed to maintain their calibration, even after repeated use and autoclaving. A key is included with each pipettor for easy in-house calibration.

Features

- Factory calibrated to strict ISO 8655 standards-3-year warranty
- Fully autoclavable and UV resistant
- Designed for universal fit with all common brands of pipet tips
- Adjustable tip ejector

Corning® Bottle Top Dispensers

The Corning Bottle Top Dispenser is a universal solution for dispensing organic and inorganic liquids. The specialized airpurging and closed circuit system ensures no loss of reagent during dispensing, as well as when the device is not in use. The dispenser comes with 4 adapters with different diameters for universal use with multiple bottle sizes. The telescopic suction tube can be adjusted smoothly to different bottle heights. The calibration tool allows easy in-lab calibration with a built-in recalibration mechanism to ensure the highest reproducibility during the dispenser’s long life cycle. Every dispenser is individually tested and delivered with a certificate of performance. Corning Bottle Top Dispensers are suitable for using with a wide range of chemical solutions. The components that come directly in contact with the reagents are made of chemical resistant, robust materials such as platinum, ceramic, PTFE, or borosilicate glass.

Features and Benefits

- Six (6) different volume models to dispense solutions from 0.25 to 100 mL
- Easy in-lab calibration with built-in recalibration mechanism
- Accurate and reproducible volume setting with quick volume lock knob*
- Fully autoclavable for protection against contamination
- 360° rotatable valve block for convenient dispensing with tough bottle connections
- Convenient 3-position discharge tube for dispensing, sample recovery, and emptying
- Unique drip-free system for your safety at work
- Easy disassembly for cleaning

*100 mL dispenser comes with volume adjustment screw

Note: Bottle Top Dispensers are sold without storage bottles.

Corning® IsoTip Filtered Pipet Tips

- IsoTip filtered pipet tips feature an inert, hydrophobic barrier that prevents aerosolized contaminants from coming in contact with pipettor shafts. (A Pipet Tip Compatibility Guide can be requested or downloaded from the Corning website.)
- Ideal for applications where avoiding cross contamination is critical, such as DNA amplification and radioisotope handling.
- Packaged sterile.
- RNase-/DNase-free.
- Nonpyrogenic.

Corning® Centrifuge Bottles

Two easy grip cap styles: standard and high performance with silicone O-Ring

Note: Caps are not interchangeable among different materials or sizes.

- Wide-mouth design improves liquid handling.
- Compatible with most centrifuges and do not require special buckets
- Extra-thick walls for durability
- Leak-free processing at maximum rated speeds
- Polypropylene bottles are autoclavable at 121°C, 15 psi for 20 minutes.

Corning® External Thread Cryogenic Vials

- Manufactured from polypropylene to withstand temperatures down to -196°C
- Black graduations with large marking spot
- Vials have a silicone washer for a secure seal.
- 2 mL self-standing vials are available in five cap colors
- Vials may be color coded with inserts.
- Self-standing vials have a special base design allowing them to be locked into cryogenic rack and tray (Cat. No. 431131) for single-handed manipulation.
- Free foam rack with each case
- RNase-/DNase-free
- Sterile
- Nonpyrogenic

Warning! Do not use cryogenic vials for storage in the liquid phase of liquid nitrogen. Only store vials in the vapor phase above the liquefied gas. Always use appropriate safety equipment when removing vials from cryogenic storage.

Corning® Disposable Glass Pasteur Pipets, Bulk Pack, Nonsterile, Unplugged

Corning disposable glass Pasteur pipets are available in convenient Packages. One-time use eliminates the danger of cross-contamination of valuable specimens or laboratory reagents. These pipets feature a constriction one inch below the top to facilitate plugging. They are ideal for rapid nonvolumetric transfer work in bacteriology, immunology, hematology, and serology studies, as well as blood bank and clinical chemistry procedures.

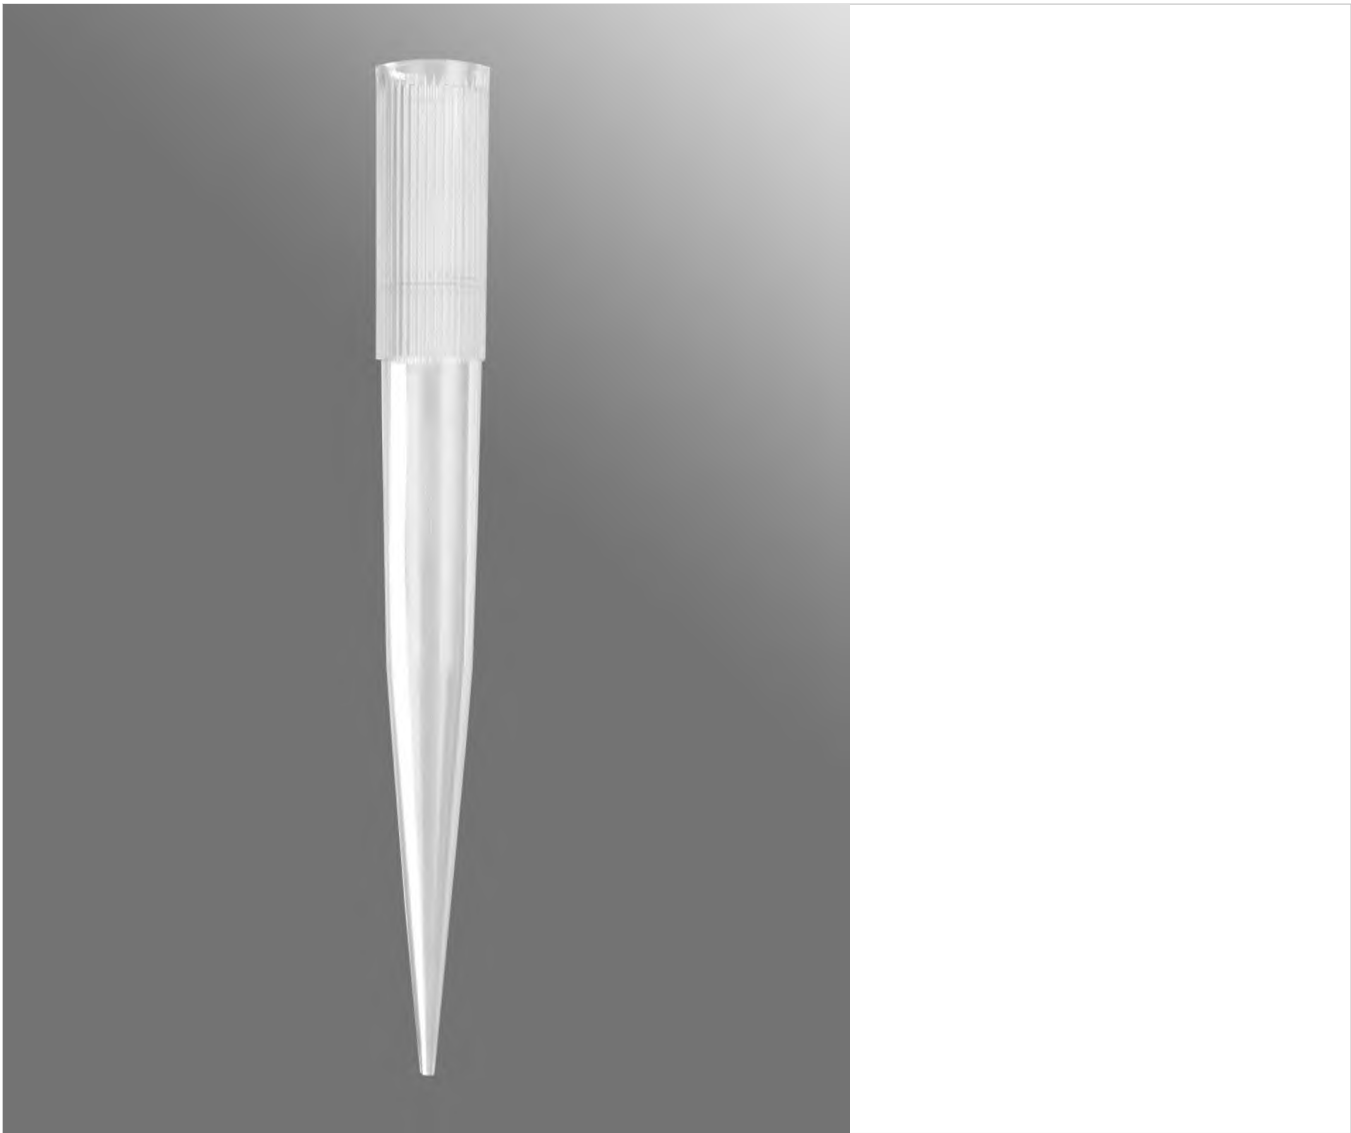

“B” series pipets are soda lime glass. “D” series are borosilicate glass.

Triple-bagged Packaging for Stripette™ Serological Pipets

Corning’s triple-bagged packaged pipets are a safety and convenience revolution. This extraordinary packaging is ideal for cell-based vaccine and drug production facilities, or other laboratory clean rooms.

- Triple-bagged
- Each pipet is individually wrapped in easy open paper/plastic
- No need for decontamination spraying with alcohol
- Sterility Assurance Level (SAL) of 10⁻⁶

Note: Triple-bagged packaged Stripettes have the same product claims and features as the standard Stripettes except for the sterility and packaging.

Corning® Easy Grip Polystyrene (PS) Storage Bottles

- Disposable polystyrene bottles for storage of media, buffers, and other aqueous solutions
- Corning low profile style has easy grip sides that facilitate handling
- Plug seal caps (45 mm) provide an airtight seal and help minimize the risk of contamination.
- Bottles can be used with Corning vacuum filtration systems with 45 mm neck sizes (Cat. Nos. 430626, 430627, 431161, 430049, 430513, 430514, 431118, 430015, and 431174).

Corning® DeckWorks Hinged Rack Low Binding Pipet Tips

Corning DeckWorks low binding tips are available in 10 µL, 200 µL, and 300 µL sizes. Proprietary low binding technology reduces surface tension on the interior wall of the tip. Leaching and/or subsequent sample degradation associated with silicone-based tips are eliminated. DeckWorks low binding tips are ideal for quantitative assays in which sample binding can significantly alter results. Specific applications include accurate and precise pipetting of expensive reagents, DNA, proteins and/or peptides.

Corning® Internal Thread Cryogenic Vials

- Manufactured from polypropylene to withstand temperatures down to -196°C
- Black graduations with large marking spot
- Vials have a silicone washer for a secure seal.
- 2 mL self-standing vials are available in five cap colors.
- Vials may be color coded with inserts.
- Self-standing vials have a special base design allowing them to be locked into cryogenic rack and tray (Cat. No. 431131) for single-handed manipulation.
- Free foam rack with each case
- RNase-/DNase-free
- Sterile
- Nonpyrogenic

Warning! Do not use cryogenic vials for storage in the liquid phase of liquid nitrogen. Only store vials in the vapor phase above the liquefied gas. Always use appropriate safety equipment when removing vials from cryogenic storage.

Falcon® Pipet Controller

The light, ergonomic, motorized pipet controller

Designed for use with glass and plastic serological pipets from 0.5 to 100 mL volume ranges.

Conveniently positioned switches change operating modes and speeds quickly to handle different liquid volumes and viscosities. Aspirating and dispensing speed is controlled through the finger triggers. When fully charged, the batteries enable up to 8 hours of continuous use. The large LCD display clearly indicates battery status, pipetting mode and speed.

The Falcon Pipet Controller is supplied with:

- Two-position charging stand
- Universal battery charger
- Three batteries
- Two 0.2 µm and two 0.45 µm hydrophobic
- Polytetrafluoroethylene (PTFE) filters

Additional filters are available as standard accessories. The filters, pipet holder and nosepiece are autoclavable.

Features

- Ergonomic design for exceptional comfort
- LCD display for continuous visualization of speed, modes and battery status
- Easy access to the battery compartment
- Easy maintenance

Falcon® Bulk-packaged Serological Pipets

- Polystyrene, disposable pipets for tissue culture, bacteriological, and research applications
- Sterile
- RNase-/DNase-free
- Noncytotoxic, nonpyrogenicity tested to less than 0.1 EU/mL
- BSE/TSE-free
- Negative graduations for extra capacity
- Reverse graduations (except 1 mL)
- Color-coded package and markings for ease of identification
- Polyester plug to help prevent overfill
- Accurate $\pm 2\%$ at full volume (excluding 1 and 2 mL)

Graduation alignment system

The pipet graduation alignment system is a fast and simple way to bring graduations to your line of sight. Simply pop open or peel back the top of the pipet package and line up the pipettor before completely removing the pipet from its wrapping. When you remove the pipet from its package, the graduations should face you every time.

Axygen® Axypet® Pro Single- and Multi-channel Pipettors

Axygen® Axypet® Pro Pipettors have been engineered to provide the highest levels of ergonomics, accuracy, and precision. Lightweight construction, contoured shape of the handle, and 4-digit counter were designed to ensure comfortable pipetting. All pipettors feature smooth plunger movement and extremely low pipetting forces to reduce the wrist strain and fatigue (RSI). Colored pushbuttons (included) can help define user or application for sample safety and lower risk of cross contamination.

- Ergonomic handle design for perfect fit for both right and left hand
- Convenient one-hand volume setting with auto-lock system prevents accidental volume change during work
- 4-digit counter for greater precision, perfectly positioned for visibility at all times
- Single-channel pipettors are compatible with very narrow tubes
- Fully autoclavable and UV-resistant for sample protection against contaminations
- The multi-channel shafts retract individually for perfect tip loading and easier tip ejection
- Easy in-lab calibration helps you quickly adjust your pipettor to various liquid types
- Individually tested and supplied with a certificate of quality

Corning® DeckWorks Hinged Rack Low Binding Pipet Tips

Corning DeckWorks low binding tips are available in 10 µL, 200 µL, and 300 µL sizes. Proprietary low binding technology reduces surface tension on the interior wall of the tip. Leaching and/or subsequent sample degradation associated with silicone-based tips are eliminated. DeckWorks low binding tips are ideal for quantitative assays in which sample binding can significantly alter results. Specific applications include accurate and precise pipetting of expensive reagents, DNA, proteins and/or peptides.

Corning® PET Media Bottles with Leak-proof Screw Cap Validated Against IATA Standards

Polyethylene terephthalate (PET) bottles are ideal for storage and sampling of media, biologicals, and other aqueous solutions. The PET resin makes the bottle lightweight, break-resistant and as transparent as glass.

Features:

- Packaged in two convenient, shrink-wrapped trays within an outer bag to assure cleanliness
- Break-resistant bottles are an ergonomic and easy to handle alternative to glass
- Bottles are sterilized to 10⁻⁶ SAL and nonpyrogenic
- Leakproof screw cap is validated against IATA standards for air shipments
- Molded graduations for accurate measurements
- USP Class VI compliant bottles are validated noncytotoxic and nonhemolytic

PYREX® Disposable Glass Conical Centrifuge Tubes, Ungraduated, without Screw Cap

These tubes feature more consistent uniform wall thickness, a well formed conical tapered tip, and durable tip radius. The tubes are designed to withstand centrifugation up to 3000 RCF.

Screw caps are sold separately. Product is supplied nonsterile.

For screw caps, see Cat. Nos. 9998-13, 99999-13 to fit Cat. No. 99502-5; see Cat. No. 9998-15, 99999-15 to fit Cat. Nos. 99502-10, 99502-15; see Cat. Nos. 9999-24 to fit Cat. No. 99502-50.

Corning® Stripettor™ Ultra Pipet Controller

Product Number 4099

(This is the suggested replacement for 4090, 4091, 4092, 4093, 4097, 4098)

This light, ergonomic, motorized pipet controller is designed for use with glass and plastic serological pipets from 0.5 to 100 mL. Conveniently positioned switches change operating modes and speeds quickly to handle different liquid volumes and various viscosities. Aspirating and dispensing speed is controlled through the finger triggers. When fully charged, the batteries enable up to 8 hours of continuous use. The large LCD display clearly indicates battery status, pipetting mode, and speed.

- LCD display for continuous visualization of speed, modes, and battery status
- Colored nose pieces for user or application identification
- Well positioned function buttons
- 3-position charging stand

Corning Stripettor Ultra Pipet Controller comes with a universal power supply, three 0.2 µm filters, 3 colored nose pieces, a wall hanger, and a charging stand.

Axygen® MotoPet® Pipet Controller

Product Number MOTOPET-1

Axygen® MotoPet® is a precise, motor powered, rechargeable pipet controller for volumes ranging from 0.5 mL to 100 mL. The unit has an ergonomic design and a highly efficient motor for fast aspiration and dispense of samples as large as 100 mL and full control and precision while dispensing volumes as small as 0.5 mL. It is compatible with both glass and plastic pipets.

Features

- Molded, lightweight handle for effortless pipetting even during extended use.
- Easily accessible switches allow you to choose the optimal operation mode depending on the volume and viscosity of the sample.
- PTFE filter prevents liquid from entering the unit and protects samples from cross-contamination.
- Digital display provides visual indication of battery condition, motor speed, and operating function.
- Pressure sensitive trigger buttons control rate of aspiration or dispensing.
- Aspiration speed can be set to HIGH or LOW to adjust for the volume of the pipet and viscosity of the liquid.
- Dispensing Modes: 2 (gravity and blow-out).
- Power Source: NiMH battery, up to 8 hours of continuous work
- Sterilization: Nosepiece, pipet holder, and filter are autoclavable.

Corning® Lambda™ Plus Starter Kit

Product Number 4069

The Lambda Plus Starter Kit is designed for laboratories which are about to replace their old set of pipettors, and for customers who want to get a new set of pipettors which cover the most commonly used volumes.

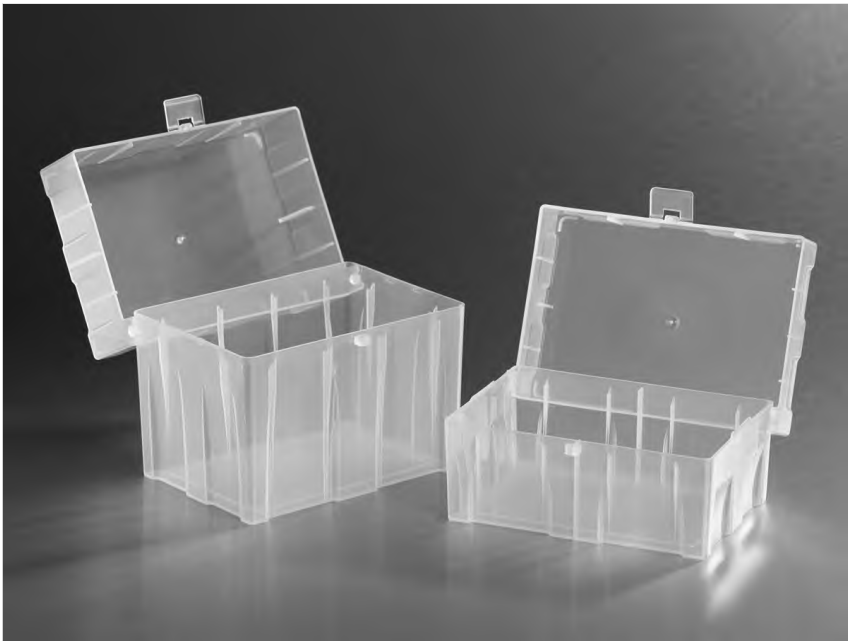

The Lambda Plus Starter Kit contains: four Lambda Plus Single-Channel pipettors conveniently packaged with useful accessories (manual, calibration key, color-coded rings, tube of piston grease and identification stickers).

- Lambda Plus Single-Channel pipettor:
 - 0.5 to 10 µL (Cat. No. 4071)
 - 2 to 20 µL (Cat. No. 4072)
 - 20 to 200 µL (Cat. No. 4074)
 - 100 to 1000 µL (Cat. No. 4075)
- Universal carousel rack for six single-channel pipettors
- Corning DeckWorks™ Pipet Tips:
 - 10 µL (Cat. No. 4135)
 - 200 µL (Cat. No. 4138)
 - 1000 µL (Cat. No. 4140)
- Free Gift - 1 Corning insulated lunch bag

PYREX® 2.2 mL Disposable Bacteriological Pipets, Multi-Pack, Sterile, Plugged, Graduated

Product Number 7058-2X

These sterile disposable 2.2 mL PYREX® borosilicate glass pipets meet the requirements recommended by the American Public Health Association as shown in This pipet is very convenient when duplicate platings are to be made on the same medium or for plating differential medium for the determination of gram-negative bacteria, mold and yeast, or total plate count. They are designed for gravity feed (blow-out is not required). These cotton-plugged pipets are packaged in sterile bags. This allows the use of several pipets at a time without contamination of the entire case. New I.S.O. color-coding is printed directly on the tear strip for easy identification by size.

Details

Qty./Pk	250 / Pk
Qty./Cs	500 / Cs
Capacity	2.2 mL
Pipet Style	Bacteriological
Tip Shape	Round
Feature	Disposable
Length	274 mm (approx.)
